

Benefits administration

Housing benefit and council tax benefit

1. The gross administration cost per case

What the indicator reports

This indicator shows the average administration cost in each council of dealing with housing benefit and council tax applications. The indicator allows costs to be more directly comparable by weighting the caseload mix using the housing and council tax benefit subsidy distribution formula.

Points to bear in mind

A council may choose to provide a high level of advice and counselling to claimants. The costs of such services will add to the cost to be reported in this indicator.

Benefit claims may be more numerous or more complicated in areas where:

- there is a high proportion of people who live at two or more addresses during the year
- there is a high proportion of applications from people in privately rented accommodation, for which the application process is more complex
- there are more people in shared accommodation, for which the application process is also more complex.

In these cases, the time taken to collect all the information needed to process a claim may be longer. This will be reflected in the costs of providing the service.

Calculation of the cost per case is based on a weighting formula provided by the Department for Work & Pensions to reflect the work involved in handling different types of case. This formula changed in 2006/07 and, consequently, the information cannot be compared with that of previous years.

2. The time for processing applications from the date of receipt of the application to the day on which the claim is decided.

Type of claim	Number of claims	Average time to process
new claims		
notifications of changes of circumstances		

What the indicator reports

This indicator shows the average time taken to process applications for different types of benefits. The indicator aims to drive forward improvements in housing and council tax benefit service delivery by encouraging councils to provide a faster, more accurate, more secure service which is better integrated with other benefit providers.

Points to bear in mind

This indicator measures the efficiency of the council in processing housing benefit and council tax benefit applications. The major influencing factors will be the management and level of resources given to the task.

This indicator shows the average overall time for dealing with applications, which is important from the applicant's perspective since it is the elapsed time experienced by them.

Benefits administration

- 3
- a) **The percentage of cases for which the calculation of the amount of benefit due was correct on the basis of the information available at the determination, for a sample of cases checked post-determination**
 - b) **The amount and percentage of Housing Benefit (HB) overpayments recovered expressed as a percentage of housing benefits overpayments identified:**
 - i) **in the year**
 - ii) **for total overpayments debt at the start of the year plus the in-year overpayments**
 - c) **The amount of HB overpayments written off as a percentage of total overpayment debt outstanding.**

What the indicator reports

This indicator aims to drive forward improvements in HB/CTB service delivery by encouraging councils to provide a faster, more accurate, more secure service which is better integrated with other social security benefits administered by the Benefits Agency and Employment Service.

Checking a percentage of benefit calculations for accuracy is considered to be good benefits practice. The first part of this indicator reports the proportion of benefit cases that were calculated correctly.

Part b) reports the percentage of recoverable overpayments that that were recovered in the year.

Part c) looks at the extent to which the council needed to write off debt because it was unrecoverable as a result of:

- legal reasons
- discretionary reasons such as the financial hardship or severe medical condition of the debtor
- inability to recover the debt or trace the debtor

Points to bear in mind

For part a) councils require to sample at least 500 cases throughout the year ensuring that different types of claims are selected. A sampling methodology to select cases should also be in place. Councils with very small caseloads should sample 20% of the caseload in order to provide reasonable confidence limits.

Recoverable overpayments mean a departmental error overpayment, a fraudulent overpayment, an authority error overpayment, or a technical overpayment (each of these are defined in Article 18 of the Income-related Benefits (Subsidy to Authorities) Order 1998).

Overpayment caused by a mistake by the claimant or person acting on their behalf is also included, as well as any other type of overpayment.
