

Section 5 - Education

Pre-school experience

1. a) The percentage of children who are:
- i) in their pre-school year
 - ii) 3-year-olds in the year before their pre-school year
- who received government grant-aided education from council, private, independent and voluntary sector providers.

	Council %	Private %	Independent %	Voluntary %	Total %
i) children in their pre-school year					
ii) 3-year-olds in year before pre-school year					

- b) The percentage of these grant-aided children who received fewer than five education sessions per week during the period they were eligible:

- i) pre-school year children
- ii) 3-year-olds in the year before the pre-school year.

What the indicator reports

Pre-school education is provided to children who are eligible for government grant aided expenditure. This indicator shows the extent to which the service is provided and by whom. For eligible three-year-old children in their ante-pre-school year, it covers the proportion of children who are at least three years old at the start of the first term of the academic year.

Points to bear in mind

In addition to councils there are other providers of this service:

- Private ñ a nursery or playgroup managed by a company or business as a private business, and also includes childminders
- Independent ñ a nursery class which is part of an independent school
- Voluntary ñ a nursery or playgroup run on a non-profit basis

Guidance on the planning of pre-school education and childcare and the establishment of childcare partnerships, issued by the then SOEID in October 1998, identifies a government policy goal to:

isecure a quality part-time pre-school education place for (a) every pre-school year child whose parents want one by the winter of 1998/99; and (b) for every three-year-olds whose parents what a place by 2002i

Factors affecting the number of sessions received by children will include:

- parentsí preferences ñ they may prefer that their children, particularly three-year-olds, attend for less than five sessions per week
- councilsí policies ñ particularly where capacity is tight, councils may offer children, again particularly three-year-olds, a place with fewer than five sessions per week.

All providers of government grant-funded places are registered and inspected against quality standards and are required to follow the curriculum framework for three to five-year olds.

Education

Primary schools

2. a) The percentage of classes which fall within the following categories:

	Single-year classes	Composite classes
a) 15 or fewer pupils		
b) 16-20 pupils		
c) 21-25 pupils		
d) 26-30 pupils		
e) 31 - 33 pupils		
f) 34 or more pupils		

b) The percentage of classes with P1 to P3 pupils in which the number of pupils falls within the following bands:

	Classes with P1 to P3 pupils
a) 15 or fewer	
b) 16-20	
c) 21-25	
d) 26-30	
e) 31 - 33	
f) 34 or more	

c) The total number of primary school classes of each type: single-year, composite, and those with P1 to P3 pupils.

What the indicator reports

This indicator shows the proportions of classes of different sizes in primary schools, and also in the Primary years 1 to 3. It also shows the extent to which each council uses composite classes, and the total number of primary school classes of each type.

Composite classes are those where at least two year groups (eg Primary 4 and 5) are taught in the same teaching area or class at the same time. Councils use composite classes where there are low numbers of pupils or where the school has to adjust class sizes in accordance with the number of available teachers.

Points to bear in mind

Changes in the number of children starting school each year will result in some variation between years in:

- the total number of classes
- the balance between composite and single-year classes.

Maximum class sizes are subject to a national agreement in Scotland: the maximum for single-year classes is 33, and for composite classes it is 25 pupils.

The extent to which composite classes are used as a means of increasing average class size is a matter of policy for each council.

Education

3. The average number of pupils per primary school class.

What the indicator reports

This indicator reflects the average class size in which children are taught in primary schools.

4. a) Occupancy: the percentage of primary schools where the ratio of pupils to places is:

- 40% or less
- 41-60%
- 61-80%
- 81-100%
- 101% or more.

b) The total number of primary schools

What the indicator reports

This indicator shows the proportion of each council's primary schools within the four occupancy bands shown.

The occupancy level is a measure of how many of the places available for pupils in a school have been taken up. For example, if a school has 150 places and 120 are filled, the occupancy level is 80%. Each council determines the number of places that are available in its schools.

Points to bear in mind

The calculation of occupancy level depends on the way in which a school's capacity is determined. Councils have some discretion in this area and there may, therefore, be minor differences between the ways they determine capacity. Some of the factors which may be important are:

- whether or not gymnasiums are counted as teaching rooms
- how non-teaching rooms are treated
- the treatment of rooms used for only part of the curriculum
- whether surplus accommodation is given over to community and other use and is no longer treated as available for school use.

The variation in the number of primary schools among councils means that a small percentage of schools in a large council may represent more schools than a high percentage in a small council. For example, 10% of primary schools in Glasgow is 20, whilst 50% in Moray is 23 schools.

Secondary schools

5. a) Occupancy: the percentage of secondary schools where the ratio of pupils to places is:

- 40% or less
- 41-60%
- 61-80%
- 81-100%
- 101% or more.

b) The total number of secondary schools

What the indicator reports

This indicator shows the proportion of each council's secondary schools within the four bands shown.

The occupancy level is a measure of how many of the places available for pupils in a school have been taken up. For example, if there are 800 places and 600 are filled, the occupancy level is 75%. Each council determines the number of places that are available in its schools.

Education

Points to bear in mind

The calculation of occupancy level depends on the way in which a school's capacity is determined. Councils have some discretion in this area and there may, therefore, be minor differences between the ways they determine capacity. Some of the factors which may be important are:

- whether or not gymnasiums are counted as teaching rooms
- how non-teaching rooms are treated
- the treatment of rooms used for only part of the curriculum
- whether surplus accommodation is given over to community and other use and is no longer treated as available for school use.

The variation in the number of secondary schools between councils means that a small percentage of schools in a large council may represent more schools than a high percentage in a small council. For example, 50% of secondary schools in North Lanarkshire is 13, whilst 100% in Angus is eight schools.

Special educational needs

6. The average time taken to complete assessments of special educational needs, and the percentage completed within the following time bands:

- **up to 18 weeks**
- **19 to 26 weeks**
- **27 to 39 weeks**
- **40 to 52 weeks**
- **more than 1 year.**
- **average time for completion of all assessments**

What the indicator reports

An assessment of a pupil's special educational needs may be required as a result of a child having a learning difficulty, physical disability, psychological disturbance, or any combination of these. These needs cannot normally be met from the resources ordinarily available in schools.

This indicator reports the average time it takes each council to carry out assessments of children who may have special educational needs, and the percentages assessments completed within each of the time bands.

Following an assessment, the council must notify the child's parent or guardian as to whether or not it intends to record the child as having special educational needs, and the reasons for its decision.

The council is obliged to provide for the special educational needs of a child for whom it creates a record of need.

Points to bear in mind

The key factors which influence this indicator are:

- the efficiency of professional and administrative input
- the number and complexity of the referrals received.

In some cases, a longer time for completion of the assessment is pre-planned. This occurs when:

- an assessment is delayed to accommodate a change in a child's circumstances or personal development; for example, when a child is approaching the move from primary to secondary school, the assessment may be timed to coincide with this event
- a longer time to complete an assessment is negotiated with the parents or guardian of a child, or stems from a request by them for a delay.
