

Primary schools – the percentage of schools in which the ratio of pupils to available places is between 61% and 100%

The indicator reflects the extent to which each council's primary schools are properly occupied.

Points to bear in mind

Councils have some discretion in the way they measure occupancy levels and there may, therefore, be minor differences between them. Some of the factors that may be important are:

- how non-teaching rooms are treated
- how rooms used for only part of the curriculum are treated
- whether surplus accommodation is given over to community and other use and is no longer treated as available for school use
- whether or not gymnasiums are counted as teaching rooms.

Occupancy rates may vary between years due to a range of factors, including changes in the number of children starting primary school each year.

A school may be considered viable despite low occupancy levels for a number of reasons, including:

- the lack of suitable alternative provision locally
- the desirability of maintaining a school within a given community
- the effect of closure on travelling time for pupils.

Aberdeenshire
East Dunbartonshire
Eilean Siar
Inverclyde

Supervision - percentage of children made subject to a supervision order that were seen by a supervising officer within 15 days

This indicator is based on National Standard 14 as defined in *Blueprint for the Processing of Children's Hearings Cases: Inter-agency Code of Practice and National Standards* (updated Scottish Executive 2001), which was developed by the multi-agency Time Intervals Working Group. The National Standard is that "the local authority will give effect to supervision requirements with no condition of residence within 15 days of date of issue by the children's hearing"

The indicator **excludes** those cases where the hearing imposes a condition of residence on the child. That is, where the child is placed in some form of residential establishment or required to stay at a specific address away from home (eg. with a grandparent).

Points to bear in mind

This indicator shows how well councils are meeting the national target time for allocating a social worker (supervising officer) and arranging for a visit to the child/family to take place as the first step in the programme of work with the child.

Staff qualification – the percentage of care staff in residential homes for children, who are qualified

This indicator provides one measure of the quality of residential care and is generally accepted as a reasonable indirect measure of quality. It reports the extent to which care staff – that is, staff providing direct care to residents – are appropriately qualified. Staff qualification is only one of a potentially large number of criteria that contribute to quality in residential care, but it is an important and measurable one.

The indicator relates only to staff in residential homes for children age 0-17 years managed by councils. It excludes those managed by the voluntary and private sectors.

Appropriate qualifications for care staff are established by the Scottish Social Services Council. This indicator reflects the proportion of staff holding social work, social care and some other qualifications, which are sufficient to meet qualification requirements for residential care.

Points to bear in mind

The indicator will be affected by:

- the policies of councils on recruiting staff who are suitably qualified, and on training existing staff
- the availability of suitably qualified staff.

Education & children's services

Staff qualification – the percentage of care staff in residential homes for children who are qualified

Privacy - percentage of residential places occupied by children that are single rooms

Research in relation to the preferences of residents in residential establishments confirms that privacy is of particular importance. This indicator is a measure of one aspect of the quality of residential services commissioned by councils. In some councils a significant proportion of residential care is commissioned/ purchased from the private and voluntary sectors. For that reason, the information covers those sectors also.

It is recognised that it will be desirable for councils to use some double rooms to accommodate siblings. For this reason, it may not be possible or desirable for councils to achieve 100% of places provided as single rooms.

Points to bear in mind

The measure is likely to be affected by:

- limitations in the capital resources available to councils and the owners of homes in the voluntary and private sectors to improve homes by increasing the number of single rooms, or by providing en-suite facilities
- the physical layout of an existing home which may limit the scope for creating single rooms or en-suite facilities
- design standards for new homes which encourage greater provision for privacy

Privacy - percentage of residential places occupied by children that are single rooms

The following councils were ranked 25th or below in 2003/04:

East Renfrewshire
Inverclyde
Moray
North Lanarkshire
Perth & Kinross
Renfrewshire
South Lanarkshire
West Dunbartonshire

The following councils did not make any material improvement in their performance by 2005/06:

West Dunbartonshire

Privacy - percentage of residential places occupied by children that have en-suite facilities

This indicator measures one aspect of the quality of residential services commissioned by councils. In some councils, a significant proportion of residential care is commissioned/purchased from the private and voluntary sectors. For that reason, the information covers those sectors also.

The definition of 'en-suite facilities' represents a minimum standard which many, but not all, homes will have gone beyond by also providing either a shower or a bath in the apartment for the sole use of the resident.

Points to bear in mind

The measure is likely to be affected by:

- limitations in the capital resources available to councils and the owners of homes in the voluntary and private sectors to improve homes by increasing the number of single rooms, or by providing en-suite facilities
- the physical layout of an existing home which may limit the scope for creating single rooms or en-suite facilities
- design standards for new homes which encourage greater provision for privacy

Privacy - percentage of residential places occupied by children that have en-suite facilities

The following councils were ranked 25th or below in 2003/04:

Aberdeen City
Angus
Dumfries & Galloway
Fife
Midlothian
North Ayrshire
Shetland Islands
South Lanarkshire

The following councils did not make any material improvement in their performance by 2005/06:

Dumfries & Galloway
Shetland Islands

Respite care – total overnight respite nights provided per 1,000 population

Respite care is a service intended to benefit a carer and the person he or she cares for by providing a short break from caring tasks. The break is made possible through alternative care arrangements. This indicator shows the overall level of respite care provided or purchased by the Council, or by voluntary organisations funded for this purpose by the Council, in order to give overnight respite relating to children.

Points to bear in mind

The indicator will be affected by:

- the pattern of need and demand in the area
- the availability of respite care

Education & children's services

Respite care - total overnight respite nights provided per 1,000 population

Unreliable/Unreported Data in 2005/06

Council	03/04	04/05	05/06
Aberdeen City	-	-	<u>77.3</u>
Argyll & Bute	-	-	<u>50.5</u>
Fife	-	-	FTR

Reason for Unreliable Determination in 2005/06

Aberdeen City - The information entered into this system is not consistent with other data and the LA is unable to identify which is correct. Both Adult Social Work and Children's Services indicators are prepared using the same system.

Argyll & Bute - Audit trails were unreliable with discrepancies and conflicting data meaning little, or no, reliance could be placed upon the submitted service area figures.

Notes

An underlined PI measurement indicates unreliable data.

Respite care – percentage of respite nights not in a care home

Respite care is a service intended to benefit a carer and the person he or she cares for by providing a short break from caring tasks. The break is made possible through alternative care arrangements which, for overnight care may include:

- support at home enabling the carer to be absent
- accommodation in a care home
- other accommodation away from home
- care with another family of individual

This indicator shows the extent to which overnight care for children was provided other than in a care home.

Points to bear in mind

The indicator shows only respite care provided or purchased by the Council, or by voluntary organisations funded for this purpose by the Council. The indicator will be affected by:

- the pattern of need and demand in the area
- the availability of respite care.

Education & children's services
