

Protective services

Food hygiene - the percentage of premises with a minimum inspection frequency of six months or 12 months that were inspected on time

The purposes of food hygiene inspections are to:

- identify potential risks to the health of the public arising from the processing, cooking, handling and storage of food
- confirm that food preparation processes meet the requirements of the Food Safety Act 1990.

Business premises dealing in food are categorised according to the frequency with which they should be inspected, depending on their level of food safety risk. This risk is determined on the basis of the type of premises and the confidence that the council has in the management of food processes at the premises.

The indicator provides information on the percentage of targeted premises inspected within the target time. It excludes:

- those premises now identified as 'Approved premises' for which the inspection frequency is variable
- those lower risk premises for which the inspection frequency is greater than 12 months.

Points to bear in mind

Factors that will influence a council's decision on the required number of inspections are:

- the likely risk according to the type of food
- the extent to which food is handled, and the risk of cross-contamination where a process involves both raw and cooked food
- the method of processing. Particular emphasis is placed on inspecting any high-risk product where the conditions can allow the growth of food poisoning organisms – for example, canning, vacuum packing and any process where temperature is a controlling factor
- the number of consumers likely to be put at risk if there is a failure in food hygiene and safety procedures
- the cleanliness, layout, lighting, ventilation and structural condition of the premises
- the attitude and technical knowledge of the management on hygiene and safety matters.

Protective services

Food hygiene - the percentage of premises with a minimum inspection frequency of 12 months or less, that were inspected on time

Unreliable/Unreported Data in 2005/06

Council	03/04	04/05	05/06
Eilean Siar	97.9	97.7	<u>100.0</u>

Reason for Unreliable Determination in 2005/06

Eilean Siar - Data for indicator 1a) could not be separated from the normal inspections and so are not shown separately, but are included in 1b), c) and d).

Notes

An underlined PI measurement indicates unreliable data.

Protective services

Food hygiene - the percentage of premises with a minimum inspection frequency of 12 months or less, that were inspected on time

The following councils were ranked 25th or below in 2003/04:

Aberdeenshire
Dumfries & Galloway
Falkirk
Moray
Orkney Islands
Perth & Kinross
Scottish Borders

The following councils did not make any material improvement in their performance by 2005/06:

Moray

Protective services

Noise complaints - the percentage of cases settled on first contact that were dealt with on day of receipt

Noise complaints settled on first contact with the complainant are those settled as a result of initial discussion or correspondence between the council and the complainant without the requirement for further investigation or action to check the extent of the problem.

Points to bear in mind

The key factors that influence this indicator include:

- the level of service the council provides (eg 7 days a week, 24 hours a day; or 5 days a week, office hours only)
- the volume and complexity of complaints
- the extent to which councils use formal notification procedures against those found responsible for noise.

Protective services

Noise complaints - the percentage of cases settled on first contact that were dealt with on day of receipt

Unreliable/Unreported Data in 2005/06

Council	03/04	04/05	05/06
Shetland Islands	33.3	87.5	<u>56.5</u>

Reason for Unreliable Determination in 2005/06

Shetland Islands - The figures could not be substantiated by supporting documentation.

Notes

An underlined PI measurement indicates unreliable data.

Protective services

Noise complaints - the percentage of cases settled on first contact that were dealt with on day of receipt

The following councils were ranked 25th or below in 2003/04:

East Ayrshire
Falkirk
Fife
Shetland Islands
South Ayrshire
West Dunbartonshire
West Lothian

The following councils did not make any material improvement in their performance by 2005/06:

Falkirk
Shetland Islands (Unreliable in 2005/06)
West Lothian

Protective services

Noise complaints - the percentage of cases needing further action, completed within 14 days of receipt

This indicator reveals the recorded incidence of noise complaints for which the council accepts a responsibility to try to resolve the problem but which cannot be adequately dealt with without further investigation.

Points to bear in mind

The key factors that influence this indicator include:

- the level of service the council provides (eg 7 days a week, 24 hours a day; or 5 days a week, office hours only)
- the volume and complexity of complaints
- the extent to which councils use formal notification procedures against those found responsible for noise.

All councils will have a small proportion of complex complaints that take a long time to clear-up.

Protective services

Noise complaints - the percentage of cases needing further action, completed within 14 days of receipt

Protective services

Trading Standards, Consumer complaints – the percentage of complaints processed within 14 days of receipt

Complaints are requests to the council to investigate the activities of a trader or traders. Both enquiries and complaints relate to goods or services which the consumer suspects or believes have been poor, unfair or based on illegal trading practice by a trader – for example, selling faulty, dangerous or wrongly described goods, or setting unreasonable conditions of sale.

The indicator does not provide information on the quality of any advice or investigation, or on its usefulness to the consumer or business.

Points to bear in mind

The number and complexity of enquiries and complaints will affect the indicator. Many enquiries can be dealt with speedily, often on the same day or within a few days. The investigative work involved in complaints means that they often take longer to complete.

The indicator relates solely to the time taken to complete a complaint irrespective of the outcome.

Protective services

Consumer complaints - the percentage of complaints processed within 14 days of receipt

Protective services

Trading Standards, Business advice requests – the percentage of requests dealt with within 14 days of receipt

Business advice is given in response to enquiries by individual businesses. It includes approaches made in person and enquiries received by letter and telephone, but excludes advice given as part of a routine inspection of trading premises.

The indicator does not provide information on the quality of any advice or investigation, or on its usefulness to the consumer or business.

Points to bear in mind

The number and complexity of advice requests will affect the indicator.

Protective services

Inspection of trading premises - the percentage of premises in the high and medium inspection risk categories (one year and two years) that were inspected on time

Inspection is used to enforce standards for trading premises in relation to fair trading, quantity, quality and safety ('Fair Trading', 'Metrology', 'Quality Standards' and 'Safety' respectively). The indicator provides information on the extent to which the planned programme of premises in the high and medium risk categories (one to two years) was successfully completed.

While the risk categories are national, the designation of the number of premises in each category is determined by the council. Achievement is, therefore, a measure of the efficiency of the council in attaining its own target number of visits.

Points to bear in mind

Performance will be affected by efficiency in completion of visits (itself a reflection of the complexity of the visit process), ease of access and the skills and number of staff involved.

Protective services

Inspection of trading premises - the percentage of premises in high and medium risk inspection level that were inspected on time
