Progress towards Best Value

Between 1999 and 2002, the Accounts Commission's Performance Management and Planning (PMP) audit assessed the arrangements that councils' had in place to manage their performance under Best Value. It examined the extent to which councils and their various services had in place the basic building blocks for Best Value, in particular the key management processes required. Comment on the findings of the PMP Audit for the council may be found in the Profiles for 2001/02.

The PMP audits have been superseded by a cyclical programme of Best Value and Community Planning audits. This programme began in early 2004 and aims to cover all 32 councils over three years.

1. An underlined measurement indicates unreliable data.
2. This measure is presented in family groups in Section 3.
3. Unreliable data has not been ranked.

Reason for unreliable determination 2006/07

42 - This part of the SPI was inaccurate as the total floor areas stated in the return did not agree back to the conditions surveys undertaken by the Council on each building. The Council were unable to submit revised information to meet the submission deadline.

43 - The Council did not carry out any formal suitability surveys in 2006-07 or the preceding 5 years as required by the guidance. The Council has used data from its conditions survey and used these as estimates of how suitable buildings have been. It is our view that this does not follow the requirements stated in the guidance.
