

Housing

Response repairs

- T 1:**
- a) **The length of time that the council allows for carrying out various categories of repairs and the number and percentage of repairs completed within the target timescale for each category.**
 - b) **The proportion of repairs due to be completed within 24 hours that were completed within the targets set by the council**

What the indicator reports

This indicator sets out the number of response repairs undertaken by each council, the timescales that each council sets for each of its repairs categories and the levels of success in achieving the targets shown.

The indicator also reports the percentage of all repairs due to be completed within 24 hours that were completed within targets set (eg 4 hours, 12 hours or 24 hours).

Response repairs are maintenance jobs which a council has agreed to carry out within a set timescale at the request of the tenant. Councils classify repairs into various priority categories each with its own timescale. For example, a council may undertake to repair a burst pipe within four hours, whereas it may allow two to six weeks to repair a window-sill.

Councils are free to decide how many repairs categories are appropriate, and choose the timescale for each category.

Classifying and undertaking a repair as an 'emergency' (ie where danger would arise or damage could be caused) generally costs more than it does to have the work done under another category. Therefore, treating a high proportion of repairs as emergencies is likely to increase costs.

Points to bear in mind

For this indicator, response repairs do not include maintenance work which councils:

- chose to undertake as part of a planned programme of improvements
- advised tenants would not be carried out due to financial constraints
- undertook to improve the condition of empty houses.

The standards set for each category cover the period of time between a repair request being received by the council and the work being completed satisfactorily. Repairs have to be completed to the council's satisfaction, and thus the indicator captures both efficiency and quality aspects of the repairs service.

Councils may use a range of contractors, including their own directly employed workforce to undertake housing repair work. The council has to notify the contractor what work should be done. This means that meeting the target time requires both the council and the contractor to work effectively.

Many councils may use the same name for a repair category (eg 'urgent') but the target timescale associated with it may vary between them.

In accordance with the developed criteria (see Section 1) this is a TRANSITIONAL indicator

Housing

Managing tenancy changes

- 2: The total annual rent lost due to houses being unoccupied, expressed as a percentage of the total amount of rent due in the year.

What the indicator reports

This indicator shows the level of rent lost due to houses remaining empty when they are available for letting.

Points to bear in mind

Some of the factors which affect a council's ability to re-let vacant property include:

- the condition of the property
- the type of property (eg tenement flat, end-of-terrace house)
- the location of the property
- the general level of demand for council housing in an area.

The council's policy on moving tenants into alternative accommodation while improvement works are carried out to their home, thereby incurring a loss of rental income for the council during that period, will influence the indicator.

Properties which are either unsafe for occupation or which the council intends to sell are excluded from the indicator.

- 3: a) Stock which is **not low demand** - the number of dwellings that were re-let within the following time bands.

Void period	Number of houses relet
Less than 2 wks	
2 – 4 wks	
5 – 8 weeks	
9 – 16 weeks	
More than 16 weeks	
Average re-let times	days

- b) **Low demand stock** - the number of dwellings that were re-let within the following time bands.

Void period	Number of houses relet
Less than 2 wks	
2 – 4 weeks	
5 – 8 weeks	
9 – 16 weeks	
17 – 32 weeks	
33 – 52 weeks	
more than 52 weeks	
Average re-let times	days

- c) For low demand stock,
- i) the number remaining un-let at the year end
 - ii) the average period these dwellings had been un-let at the year end
- d) The number of dwellings considered to be low demand at the year end? (includes both void and occupied properties)

Housing

- e) **The number at d) above considered to be low demand at the start of the year? (includes both void and occupied properties)**
- f) **The number at d) above that were not actively being re-let because they were subject to a disposal strategy.**

What the indicator reports

This indicator shows the efficiency of a council in re-letting its housing stock. The indicator separates out low demand from other dwellings to allow councils to be compared on an equal basis.

A low demand property (void or occupied) is a property where one or more of the following symptoms are exhibited:

- a small or non-existent waiting list for the property
- tenancy offers on a dwelling are frequently refused for reasons other than personal reasons
- higher than normal rates of tenancy turnover for a property in an area.

Points to bear in mind

There are many factors that contribute to the problem of low demand properties such as:

- poor or unpopular design or condition of individual properties/blocks or estates
- poor quality or availability of local services
- inaccessible location
- stigma/poor perception of area
- anti-social behaviour/difficult neighbours.

Rent management

- 4:
- a) **Current tenant arrears as a percentage of the net amount of rent due in the year**
 - b) **The percentage of current tenants owing more than 13 weeks' rent at year end, excluding those owing less than £250**
 - c) **The proportion of those tenants giving up their tenancy during the year that were in rent arrears**
 - d) **The average debt owed by tenants leaving in arrears, as a proportion of the average weekly rent**
 - e) **The proportion of arrears owed by former tenants that was either written off or collected during the year.**

What the indicator reports

Current arrears are amounts of rent that are due and unpaid by current tenants. This indicator is, therefore, a measure of the council's performance in collecting the rent due to it from its tenants.

Part a) of this indicator is a measure of the council's performance in collecting rent due to it from its current tenants.

Part b) shows the level of serious arrears cases

Parts c) and d) show the extent to which tenants are leaving their tenancy with rent arrears and the extent of those arrears. Good rent management processes will help to keep arrears down and, therefore, reduce the extent to which tenants either leave their tenancies in arrears or are evicted as a result of arrears.

Part e) indicates the extent to which councils are successful in managing arrears owed by former tenants.

Housing

Points to bear in mind

Actions which a council can take to improve rent collection levels include:

- maximising the methods for ease of payment
- prompt notification of changes to rent levels
- effective management of the rent arrears recovery process (including the timing of action on arrears cases, the effectiveness of communication with tenants, and the efficiency of monitoring procedures)
- debt counselling services.

The net amount of rent due in the year excludes rent which is funded by housing benefit. Therefore, the level of uptake of housing benefit may have an impact on the indicator.

Council house sales

- 5: **a) The percentage of house sales completed within 26 weeks**
 b) The average time for council house sales

What the indicator reports

The Scottish Executive has set councils a target of six months (26 weeks) for processing council house sales. This indicator shows the extent to which each council has achieved the target.

Points to bear in mind

The period after the council makes an offer to sell is included in the indicator and, therefore, applicants' responses to offers is a factor that affects the time taken. However, it is the council's own management processes (resting primarily with legal staff), and the level of resources devoted to this activity which are the more significant in determining performance.

Homelessness

- 6: **a) The number of households assessed as homeless or potentially homeless during the year.**
 b) The average time between presentation and completion of duty by the council for those cases assessed as homeless or potentially homeless
 c) The number of cases reassessed as homeless or potentially homeless within 12 months of previous case being completed, as a proportion of all cases assessed as homeless or potentially homeless during the year.

What the indicator reports

The level of homelessness that councils have to deal with is less than the actual level of homelessness because of under-reporting. Nevertheless, recent government initiatives to improve the rights of homeless people and to provide them with greater access to services may be expected to lead to an increase in recorded homelessness applications over the next year or two.

This indicator deals with aspects of the council's duty in relation to the current homelessness legislation. It shows both the efficiency of the council in fulfilling its responsibility to those who present themselves as homeless or potentially homeless and are subsequently assessed as being so, and the effectiveness of its processes for successfully fulfilling its duty and reducing repeat homelessness.

Points to bear in mind

The level of homelessness that councils have to deal with is less than the actual level of homelessness because of under-reporting. Nevertheless, recent government initiatives to improve the rights of homeless people and to provide them with greater access to

Housing

services may be expected to lead to an increase in recorded homelessness applications over the next year or two.

Clearly, it is better that councils should reduce the time taken to complete their duty. However, this has to be seen in the context of their effectiveness (ie the appropriateness of the solution) in doing so. The ability of councils to improve both their efficiency and their effectiveness will be affected by, for example, the availability of appropriate accommodation.
