

Primary schools – the percentage of schools in which the ratio of pupils to available places is between 61% and 100%

The indicator reflects the extent to which each council's primary schools are properly occupied.

Points to bear in mind

Councils have some discretion in the way they measure occupancy levels and there may, therefore, be minor differences between them. Some of the factors that may be important are:

- how non-teaching rooms are treated
- how rooms used for only part of the curriculum are treated
- whether surplus accommodation is given over to community and other use and is no longer treated as available for school use
- whether or not gymnasiums are counted as teaching rooms.

Occupancy rates may vary between years due to a range of factors, including changes in the number of children starting primary school each year.

A school may be considered viable despite low occupancy levels for a number of reasons, including:

- the lack of suitable alternative provision locally
- the desirability of maintaining a school within a given community
- the effect of closure on travelling time for pupils.

Aberdeenshire
Angus
East Dunbartonshire
East Renfrewshire
Eilean Siar
Inverclyde
North Lanarkshire
Perth & Kinross

The following councils did not make any material improvement in their performance by 2006/07:

Aberdeenshire
Angus
Eilean Siar
Inverclyde
North Lanarkshire
Perth & Kinross

Supervision - percentage of children made subject to a supervision order that were seen by a supervising officer within 15 days

This indicator is based on National Standard 14 as defined in *Blueprint for the Processing of Children's Hearings Cases: Inter-agency Code of Practice and National Standards* (updated Scottish Executive 2001), which was developed by the multi-agency Time Intervals Working Group. The National Standard is that "the local authority will give effect to supervision requirements with no condition of residence within 15 days of date of issue by the children's hearing"

The indicator **excludes** those cases where the hearing imposes a condition of residence on the child. That is, where the child is placed in some form of residential establishment or required to stay at a specific address away from home (eg. with a grandparent).

Points to bear in mind

This indicator shows how well councils are meeting the national target time for allocating a social worker (supervising officer) and arranging for a visit to the child/family to take place as the first step in the programme of work with the child.

Staff qualification – the percentage of care staff in residential homes for children, who are qualified

This indicator provides one measure of the quality of residential care and is generally accepted as a reasonable indirect measure of quality. It reports the extent to which care staff – that is, staff providing direct care to residents – are appropriately qualified. Staff qualification is only one of a potentially large number of criteria that contribute to quality in residential care, but it is an important and measurable one.

The indicator relates only to staff in residential homes for children age 0-17 years managed by councils. It excludes those managed by the voluntary and private sectors.

Appropriate qualifications for care staff are established by the Scottish Social Services Council. This indicator reflects the proportion of staff holding social work, social care and some other qualifications, which are sufficient to meet qualification requirements for residential care.

Points to bear in mind

The indicator will be affected by:

- the policies of councils on recruiting staff who are suitably qualified, and on training existing staff
- the availability of suitably qualified staff.

Respite care – total overnight respite nights provided per 1,000 population

Respite care is a service intended to benefit a carer and the person he or she cares for by providing a short break from caring tasks. The break is made possible through alternative care arrangements. This indicator shows the overall level of respite care provided or purchased by the Council, or by voluntary organisations funded for this purpose by the Council, in order to give overnight respite relating to children.

Points to bear in mind

The indicator will be affected by:

- the pattern of need and demand in the area
- the availability of respite care

Education & children's services

Respite care – percentage of respite nights not in a care home

Respite care is a service intended to benefit a carer and the person he or she cares for by providing a short break from caring tasks. The break is made possible through alternative care arrangements which, for overnight care may include:

- support at home enabling the carer to be absent
- accommodation in a care home
- other accommodation away from home
- care with another family or individual

This indicator shows the extent to which overnight care for children was provided other than in a care home.

Points to bear in mind

The indicator shows only respite care provided or purchased by the Council, or by voluntary organisations funded for this purpose by the Council. The indicator will be affected by:

- the pattern of need and demand in the area
- the availability of respite care.

Unreliable/Unreported Data in 2006/2007

Council	04/05	05/06	06/07
Aberdeen City	-	<u>41.5</u>	<u>17.9</u>

Reason for Unreliable Determination in 2006/2007

Aberdeen City - Unreliable data held within computer system.

Notes

An underlined PI measurement indicates unreliable data.

Respite care – total daytime respite hours provided for children per 1,000 population

Respite care is a service intended to benefit a carer and the person he or she cares for by providing a short break from caring tasks. The break is made possible through alternative care arrangements. This indicator shows the overall level of respite care provided or purchased by the Council, or by voluntary organisations funded for this purpose by the Council, in order to give daytime respite relating to children.

Points to bear in mind

The indicator will be affected by:

- the pattern of need and demand in the area
- the availability of respite care

Education & children's services

Respite care - total daytime respite hours provided for children per 1,000 population

An underlined PI measurement indicates unreliable data.

Respite care – percentage of daytime respite hours provided not in a day centre

Respite care is a service intended to benefit a carer and the person he or she cares for by providing a short break from caring tasks. The break is made possible through alternative care arrangements which, for daytime care may include:

- support at home
- accommodation in a day care centre
- day activities outside the home not based in a day care centre
- day care with another family or individual

This indicator shows the extent to which daytime care was provided other than in a day care centre.

Points to bear in mind

The indicator shows only respite care provided or purchased by the Council, or by voluntary organisations funded for this purpose by the Council. The indicator will be affected by:

- the pattern of need and demand in the area
- the availability of respite care.

Education & children's services

Respite care - percentage of daytime respite hours provided not in a day centre
