Notes

1. An underlined measurement indicates unreliable data.
2. This measure is presented in family groups in Section 3.
3. Unreliable data has not been ranked.

Reason for unreliable determination 2007/08

19 - The Carefirst system reports that 52.36% of social work enquiry reports are submitted to the court by the due date. Officers advise that the Carefirst system is registering the outcome date and not the date the social enquiry report is submitted to the Court. Hence this figure was not reported as the SPI. Audit were unable to confirm the reported data and so classified the data as unreliable.

68 - Part 2b of this indicator was a failure to report in 2006/07. The Anti- Social Behaviour Team put a system in place to record time taken in 2007/08. However complaints are also dealt with by Housing Services. Housing Services provided no data on time taken to deal with domestic noise complaints. The data is unreliable as not complete.
