

Cultural & community services

Sport and leisure management

1: The number of attendances per 1,000 population for swimming pools.

What the indicator reports

This indicator reports the use made of swimming pools in each council's area. It provides the number of attendances per 1,000 population.

Points to bear in mind

Important factors that influence attendance levels include:

- the age, quality, size and range of facilities available
- the extent to which facilities and activities are publicised
- the variety, scheduling and cost of activities on offer
- the location of pools in relation to other competing leisure facilities.

Pools may vary considerably and appeal to very different groups of users, so care should be exercised in comparing the performance of councils.

When a council has more than one pool, the level of attendance at any one pool may vary considerably from the average attendance for that council.

This indicator does not record the number of users; a particular figure may reflect high usage by a small number of individuals or low usage by a large number of individuals. The indicator may also conceal wide variations in usage between different facilities within a council.

2: The number of attendances per 1,000 population for other indoor sport and leisure facilities, excluding pools in a combined complex.

What the indicator reports

The indicator reports the number of attendances per 1,000 population for a council's indoor sport and leisure facilities, other than pools.

The number of attendances indicates the extent to which facilities are used.

Points to bear in mind

Important factors that influence attendance levels include:

- the age, quality and range of facilities available
- the extent to which facilities and activities are publicised
- the variety, scheduling and cost of activities on offer
- the location of sports centres in relation to other competing leisure facilities.

When a council has more than one sports centre, the level of attendance at any one facility may vary considerably from the average attendance for that council.

This indicator does not record the number of users; a particular figure may reflect high usage by a small number of individuals or low usage by a large number of individuals. The indicator may also conceal wide variations in usage between different facilities within a council.

Cultural & community services

Museums

3 Visits to and use of Museums

- a) The number of visits to/usages of council funded or part funded museums per 1,000 population
- b) The number of those visits that were in person per 1,000 population.

What the indicator reports

The indicator reports the usage of museums whether managed or supported by councils – reflecting the different mechanisms by which the service is delivered and supported in each council's area.

Part a) of the indicator includes visits by members of the public, enquiries (through whatever medium) that mean the public gain knowledge from/about the museum collections and outreach visits by museum staff to specific audiences.

Part b) of the indicator shows personal visits to museums by members of the public.

Points to bear in mind

This is the first year for which this information has been collected.

Increasing usage by both personal visitors and through other enquiries are important indicators of the value of museum services.

Financial support may be in the form of either direct financial contributions or indirect support such as staff time or use of buildings.

Libraries

4: Changes in library stock:

	Adult lending stock	Children's and teenage lending stock
Recommended national target for annual number of additions per 1,000 population		
Actual additions per 1,000 population		
Stock at year end per 1,000 population		

What the indicator reports

The indicator shows the changes to available lending stock expressed as a percentage of the stock numbers for adults and children at the 31st March of the previous year. A COSLA report 'Standards for the Public Library Service in Scotland 1995' recommended that 'annual additions to adult lending stock, book and audio materials should be 280 items per 1,000 population' and that 'the annual addition of children's and teenage material should be 100 items per 1,000 of the population'.

Points to bear in mind

Changes to library stock will be affected by:

- the purchasing policy of an authority
- the demand for library stock
- levels of investment in the lending stock.

5: Library usage:

- a) number of visits per 1,000 population

Cultural & community services

b) borrowers as a percentage of the resident population

What the indicator reports

Part a) of this indicator shows the extent to which people make use of library facilities and the extent to which library services are reaching their potential service users. Visitor numbers do not yet include those 'virtual' visitors making use of services on-line.

Part b) shows the percentage of the resident population that borrowed books and other items (as opposed to people registered with the library service as members) during the year.

Points to bear in mind

This is the first year that the information provided by part a) of the indicator has been collected.

The percentage of the population who actively use library loan facilities will be affected by:

- the marketing policy of an authority
- the ability of an authority to supply the stock which its users want
- the location of libraries
- the demand for library stock
- levels of investment in the lending stock.

6: Learning centre and learning access point users

a) The number of users as a percentage of the resident population

b) The number of times the terminals are used per 1,000 population.

What the indicator reports

'Learning centres or access points' are terminals provided either in clusters or singly within the council's public libraries (including mobile libraries) for the provision of a range of networked electronic resources that include:

- office packages covering word processing, spreadsheet and database applications
- information resources including CD Rom, disk and database services
- Internet and e-mail facilities.

The indicator reflects the use being made of the facilities provided through councils' library services in conjunction with the New Opportunities Fund as part of the government's commitment to life-long learning and improving information technology and communications skills. As with other library services, councils are responsible for developing the use of these services.

Points to bear in mind

The proportion of the population using the learning centres and access points will reflect the extent to which each council is developing its provision across its area in accordance with the needs of its population.

The use of the service will reflect the extent to which it is marketed by the council and is seen as a valuable service meeting the needs of users.
