Social work in Scotland

ACCOUNTS COMMISSION 

Prepared by Audit Scotland
September 2016

The Accounts Commission

The Accounts Commission is the public spending watchdog for local government. We hold councils in Scotland to account and help them improve. We operate impartially and independently of councils and of the Scottish Government, and we meet and report in public.

We expect councils to achieve the highest standards of governance and financial stewardship, and value for money in how they use their resources and provide their services.

Our work includes:

- securing and acting upon the external audit of Scotland's councils and various joint boards and committees
- assessing the performance of councils in relation to Best Value and community planning
- carrying out national performance audits to help councils improve their services
- requiring councils to publish information to help the public assess their performance.

You can find out more about the work of the Accounts Commission on our website: www.audit-scotland.gov.uk/about/ac 

Audit Scotland is a statutory body set up in April 2000 under the Public Finance and Accountability (Scotland) Act 2000. We help the Auditor General for Scotland and the Accounts Commission check that organisations spending public money use it properly, efficiently and effectively.

Key facts

Summary

Key messages

- 1** Current approaches to delivering social work services will not be sustainable in the long term. There are risks that reducing costs further could affect the quality of services. Councils and Integration Joint Boards (IJBs) need to work with the Scottish Government, which sets the overall strategy for social work across Scotland, to make fundamental decisions about how they provide services in the future. They need to work more closely with service providers, people who use social work services and carers to commission services in a way that makes best use of the resources and expertise available locally. They also need to build communities' capacity to better support vulnerable local people to live independently in their own homes and communities.
 - 2** Councils' social work departments are facing significant challenges because of a combination of financial pressures caused by a real-terms reduction in overall council spending, demographic change, and the cost of implementing new legislation and policies. If councils and IJBs continue to provide services in the same way, we have estimated that these changes require councils' social work spending to increase by between £510 and £667 million by 2020 (16–21 per cent increase).
 - 3** The integration of health and social care has made governance arrangements more complex, but regardless of integration, councils retain statutory responsibilities in relation to social work services. Elected members have important leadership and scrutiny roles in councils. It is essential that elected members assure themselves that service quality is maintained and that risks are managed effectively. Elected members have a key role to play in a wider conversation with the public about service priorities and managing people's expectations of social work and social care services that councils can afford to provide in the future. The Scottish Government also has an important role to play in setting the overall context of the debate.
 - 4** With integration and other changes over recent years, the key role of the chief social work officer (CSWO) has become more complex and challenging. Councils need to ensure that CSWOs have the status and capacity to enable them to fulfil their statutory responsibilities effectively.
-

current approaches to delivering social work services will not be sustainable in the long term

Key recommendations

Social work strategy and service planning

Councils and IJBs should:

- instigate a frank and wide-ranging debate with their communities about the long-term future for social work and social care in their area to meet statutory responsibilities, given the funding available and the future challenges ([paragraph 111](#))
- work with the Scottish Government, their representative organisation (COSLA or the Scottish Local Government Partnership (SLGP)), Social Work Scotland and other stakeholders to review how to provide social work services for the future and future funding arrangements ([paragraphs 35–41](#))
- develop long-term strategies for the services funded by social work by:
 - carrying out a detailed analysis of demographic change and the contribution preventative approaches can make to reduce demand for services ([paragraph 52](#))
 - developing long-term financial and workforce plans ([paragraph 81](#))
 - working with people who use services, carers and service providers to design and provide services around the needs of individuals ([paragraphs 69–72](#))
 - working more closely with local communities to build their capacity so they can better support local people who may be at risk of needing to use services ([paragraph 112](#))
 - considering examples of innovative practice from across Scotland and beyond ([paragraphs 54, 67–68](#))
 - working with the NHS and Scottish Government to review how to better synchronise partners' budget-setting arrangements to support these strategies ([paragraph 36](#)).

Governance and scrutiny arrangements

Councils and IJBs should:

- ensure that the governance and scrutiny of social work services are appropriate and comprehensive across the whole of social work services, and review these arrangements regularly as partnerships develop and services change ([paragraphs 87– 93](#))
- improve accountability by having processes in place to:
 - measure the outcomes of services, for example in criminal justice services, and their success rates in supporting individuals' efforts to desist from offending through their social inclusion
 - monitor the efficiency and effectiveness of services

- allow elected members to assure themselves that the quality of social work services is being maintained and that councils are managing risks effectively
- measure people’s satisfaction with those services
- report the findings to elected members and the IJB ([paragraph 90, 108–109](#)).

Councils should:

- demonstrate clear access for, and reporting to, the council by the CSWO, in line with guidance ([paragraphs 104–106](#))
- ensure the CSWO has sufficient time and authority to enable them to fulfil the role effectively ([paragraphs 102–107](#))
- ensure that CSWO annual reports provide an annual summary of the performance of the social work service, highlighting achievements and weaker areas of service delivery, setting out the council’s response and plans to improve weaker areas and that these are actively scrutinised by elected members ([paragraphs 108–110](#)).

Workforce

Councils should:

- work with their representative organisation (COSLA or the SLGP), the Scottish Government and private and third sector employers to put in place a coordinated approach to resolve workforce issues in social care ([paragraphs 21–23](#))
- as part of their contract monitoring arrangements, ensure that providers who use zero hours contracts allow staff to accept or turn down work without being penalised ([paragraph 24](#)).

Service efficiency and effectiveness

Councils and IJBs should:

- when planning an initiative, include evaluation criteria and extend or halt initiatives depending on the success of new approaches in improving outcomes and value for money ([paragraphs 53–53](#))
- work with COSLA to review the eligibility framework to ensure that it is still fit for purpose in the light of recent policy and legislative changes ([paragraphs 46–47](#))

Councils should:

- benchmark their services against those provided by other councils and providers within the UK and overseas to encourage innovation and improve services ([paragraphs 54, 67–68](#)).
-

Introduction

1. Scottish councils' social work departments provide and fund essential support to some of the most vulnerable people in society. They supported and protected over 300,000 people in 2014/15, around 70 per cent of whom were aged 65 and over.¹ Social work departments also provide and fund social care, for example care at home for older people who require help with dressing and taking medication. People supported by social work and social care in Scotland in 2014/15 included:

- 15,404 looked-after children (LAC), that is children in the care of their local authority
- 2,751 children on the child protection register, a list of children who may be at risk of harm²
- 61,500 people who received homecare services³
- 36,000 adults in care homes.⁴

2. In 2014/15, councils' net expenditure on social work was £3.1 billion.⁵ Net spending is total spending less income, for example from charges for services. Just over 200,000 people work in social work and social care, around one in 13 people in employment in Scotland.⁶ Many are employed in the private and third sectors that councils commission to provide services.⁷ In addition, the Scottish Government estimates that there are 759,000 unpaid carers aged 16 and over in Scotland, 17 per cent of the adult population, and 29,000 young carers under 16.⁸

3. Social work services have recently been reorganised. The Public Bodies (Joint Working) (Scotland) Act 2014 requires councils and NHS boards to create an integration authority to be responsible for the strategic planning of adult social care services, some health services and other functions delegated to it. It is also responsible for ensuring the delivery of those functions. The Integration Joint Board (IJB) also has an operational role as described in the locally agreed operational arrangements set out within their integration scheme. The Act also allows councils to integrate children's and families' services and criminal justice social work.

4. Councils delegate their responsibility for strategic planning of adult social services, and any other services they have decided to include, to the integration authority. All council areas, apart from Highland, have created an IJB to plan and commission integrated health and social care services in their areas. The voting membership of IJBs comprise equal numbers of council elected members and NHS board non-executive directors. Our recent report *Health and social care integration* includes a description of the integration arrangements in each council area.⁹

5. The Scottish Government sets the legislative basis and the overall strategic framework for the delivery of social work. Its overall vision is 'a socially just Scotland with excellent social services delivered by a skilled and valued workforce which works with others to empower, support and protect people, with a focus on prevention, early intervention and enablement'.¹⁰ The Scottish Government also sets the key outcomes that councils' social work services are expected to contribute to achieving, for example 'Our people are able to maintain their independence as they get older and are able to access appropriate support

when they need it.' This report focuses on councils' social work services, but recognises the role of the Scottish Government in setting the overall context in which councils operate.¹¹

About the audit

6. The overall aim of the audit was to examine how effectively councils are planning to address the financial and demographic pressures facing social work. The objectives were to assess:

- the scale of the financial and demand pressures facing social work
- the strategies councils are adopting to meet these challenges
- the effectiveness of governance arrangements, including how elected members lead and oversee social work services
- the impact of financial and demand pressures on people who use services and on carers, and how councils involve them in planning how services are provided.

7. Social work comprises a wide range of services, and we have not covered all of them in this report. We also did not examine health and social care integration arrangements, which will be the subject of separate audit work, but we did consider their impact on councils' financial, operational and governance arrangements. Our methodology included:

- fieldwork interviews with elected members, senior managers and social workers in six council areas, Midlothian, East Renfrewshire, Comhairle nan Eilean Siar, Glasgow City, Perth and Kinross and West Lothian
- meetings and focus groups with stakeholders, including:
 - 33 focus groups and 12 interviews with service users and carers (165 participants)
 - four focus groups with service providers (over 40 participants)
 - attending the Coalition of Carers in Scotland Annual General Meeting
- desk research, including analysing both the impact of legislation and policy, and financial and demographic data.

8. Our audit took into account the findings of previous audits including:

- [*Commissioning social care*](#)  (March 2012)
- [*Reshaping care for older people*](#)  (February 2014)
- [*Self-directed support*](#)  (June 2014)
- [*Health and social care integration*](#)  (December 2015)
- [*Changing models of health and social care*](#)  (March 2016)

In addition, we are planning further audit work on health and social care integration and following up our report on self-directed support.

9. We have produced four supplements to accompany this report:

- **[Supplement 1](#)**  presents the findings of our survey of service users and carers.
- **[Supplement 2](#)**  lists advisory group members, who gave advice and feedback at important stages of the audit. It also describes the detailed audit methodology, the roles and responsibilities of the key social work organisations and social work legislation.
- **[Supplement 3](#)**  describes the governance and scrutiny arrangements in each of our fieldwork councils, providing an illustration of the variety and complexity of arrangements across Scotland.
- **[Supplement 4](#)**  is a self-assessment checklist for elected members.

10. This report has three parts:

- **[Part 1](#)** Challenges facing social work services.
- **[Part 2](#)** Strategies to address the challenges.
- **[Part 3](#)** Social work governance and scrutiny arrangements.

Part 1

Challenges facing social work services

Key messages

- 1 Councils' social work departments provide important services to some of the most vulnerable people across Scotland. But they are facing significant challenges. These include financial pressures caused by a real-terms reduction in overall council spending, demographic changes, and the cost of implementing new legislation and policies. We have estimated that these changes require councils' social work spending to increase by between £510 and £667 million by 2020 (16–21 per cent increase), if councils and IJBs continue to provide services in the same way. Additional funding provided to IJBs via the NHS may partially relieve the financial pressures.
- 2 Councils are implementing a wide range of legislation and policy changes aimed at improving services, better supporting carers, improving outcomes for people and increasing the wages paid to adult care workers. This has significant financial implications. Councils are also under pressure due to increasing demand associated with demographic changes, particularly people living longer with health and care needs.
- 3 Since 2010/11, councils' total revenue funding has reduced by 11 per cent in real terms. Social work spending increased by three per cent in real terms over the same period, and now accounts for a third of overall council spending. Further reductions in councils' budgets are an additional pressure on social work services, particularly as their financial commitments continue to increase.
- 4 Social care providers have difficulty recruiting and retaining suitably qualified staff, particularly homecare staff and nursing staff. However, the number of social workers has increased over recent years.

councils' social work departments provide important services to some of the most vulnerable people across Scotland

Social work is a complex group of services

11. Social work departments provide and fund a wide range of specialist services for children, adults and families, and other specific groups. These services aim to improve the quality of their lives and help people to live more independently ([Exhibit 1, page 12](#)). Each of these client groups will include people requiring care, support or protection. For example, through care at home, child protection or helping people overcome addiction. Social workers deal with people with complex problems and with vulnerable people who need support at different

times or sometimes throughout their lives. They often specialise in particular service areas, for example criminal justice, children and families or mental health.

Social work services are implementing a considerable volume of legislation and policy change

12. Since the Scottish Parliament was established, there has been an increase in the volume of legislation related to social work. Councils are currently implementing several important pieces of legislation ([Exhibit 2, page 13](#)). This legislation is designed to improve services and the outcomes for people who use them, for example by bringing about increasingly personalised services to meet individuals' needs. However, implementing legislation can increase financial pressures and staff workload in the medium term.

Exhibit 1

Social work and social care services

Social work provides a variety of services to protect and support people in three client groups.

Children's services 	Adult services 	Criminal Justice services 
Support for families	Residential care	Offender services
Child protection	Care at home	Providing social enquiry reports
Adoption services	Day care	Supervision of community payback and unpaid work
Kinship care	Hospital discharge coordination	Supporting families of prisoners
Fostering	Adult support and protection	Supervision of offenders on licence
Child care agencies	Mental health and addiction services	
Looked-after young people	Dementia and Alzheimer's services	
Day care	Supporting people with disabilities	
Residential care	Services to support carers	
Child and adolescent mental health	Provision of Aids and adaptations	
Supporting child refugees	Re-ablement services	
Supporting trafficked children	Supported living	
Support for young people involved in offending behaviour	Supporting refugee families	
Support for children with disabilities and their families	Supporting victims of people trafficking	
	Intermediate care	

Exhibit 2

Social work and social care services

Councils are implementing a great deal of legislation, some with significant cost implications.

Legislation 	Key features of legislation 	Associated costs   (from the financial   memorandum to the Bills)
Social Care (Self-Directed Support) (Scotland) Act 2013	<p>The Act aims to ensure that adults and children (including carers and young carers) have more choice and control over how their social care needs are met. It stipulates the forms of self directed support (SDS) that councils must offer to those assessed as requiring community care services.</p>	<ul style="list-style-type: none"> All local authorities are at different stages in the self-directed support agenda, meaning costs will vary widely.
The Children and Young People (Scotland) Act 2014	<p>The Act makes provisions over a wide range of children's services policy, including 'Getting it Right for Every Child'. It includes:</p> <ul style="list-style-type: none"> local authorities and NHS boards having to develop joint children's services plans in cooperation with a range of other service providers a 'named person' for every child extending free early learning and childcare from 475 to 600 hours a year for all three and four-year-olds and two-year-olds who have been 'looked after' or have a kinship care residence order a statutory definition of 'corporate parenting' increasing the upper age limit for aftercare support from 21 to 26. 	<p>Additional annual costs estimated to be:</p> <ul style="list-style-type: none"> £78.8 million in 2014/15 £121.8 million in 2016/17 £98.0 million in 2019/20 Cumulative total from 2014-15 to 2019-20 is £595 million.
The Public Bodies (Joint Working) (Scotland) Act 2014	<p>The aim of the Act is to achieve greater integration between health and social care services to improve outcomes for individuals. It also aims to improve efficiency by 'shifting the balance of care' from the expensive acute sector, such as large hospitals, to less expensive community settings. The Scottish Government estimates partnerships should achieve potential efficiencies of £138-£157 million a year by providing support to keep people out of hospital and enabling them to return home as soon as they are well enough.</p>	<p>Costs to health boards and local authorities:</p> <ul style="list-style-type: none"> 2014/15: £5.35 million 2015/16: £5.6 million 2016/17: £5.6 million.

Cont.

Legislation 	Key features of legislation 	Associated costs   (from the financial memorandum to the Bills)  
<p>The Carers (Scotland) Act 2016</p>	<p>The Act aims to improve support to carers by:</p> <ul style="list-style-type: none"> • changing the definition of a carer so that it covers more people • placing a duty on local authorities to prepare an adult care and support plan or young carer statement for anyone it identifies as a carer, or for any carer who requests one • introducing a duty for local authorities to provide support to carers who are entitled under local criteria • requiring local authorities and NHS boards to involve carers in carers' services • introducing a duty for local authorities to prepare a carers strategy • requiring local authorities to establish and maintain advice and information services for carers. 	<p>Estimated additional costs for local authorities are:</p> <ul style="list-style-type: none"> • £11.3-£12.5 million in 2017/18, rising to £71.8-£83.5 million by 2021/22. • The total estimated impact on councils between 2017/18 and 2022/23 is £245-£289 million.
<p>The Community Justice (Scotland) Act 2016</p>	<p>The Community Justice (Scotland) Bill seeks to establish new arrangements for providing and overseeing community justice. Currently eight community justice authorities (CJAs) bring together a range of agencies to coordinate local services for offenders and their families. They will be abolished and replaced by a model involving national leadership, oversight and support for community justice services by a new body called Community Justice Scotland, funded by, and responsible to, Scottish ministers.</p>	<p>The provisions will have few if any financial implications for local authorities other than during the transitional period.</p>
<p>The UN Convention on the Rights of Persons with Disabilities (UNCRPD) (Scottish framework and delivery plan)</p>	<p>The delivery plan provides a framework to allow people with disabilities to have the same equality and human rights as non-disabled people. It includes legislation, such as Self-Directed Support and the Children and Young People (Scotland) Act 2014. The draft delivery plan groups the UNCRPD articles into four outcomes covering equal and inclusive communication and access to:</p> <ul style="list-style-type: none"> • the physical and cultural environment, transport and suitable affordable housing • healthcare and support for independent living, with control over the use of funding • education, paid employment and an appropriate income and support whether in or out of work • the justice system. 	<p>It is difficult to predict the overall impact in terms of cost, but it may have a significant impact on the way councils deliver services.</p>

Note: Cost information is taken from the financial memorandum that accompanies each Bill.

Source: Audit Scotland

13. In addition to changes in legislation, there have been a number of significant policy developments, some backed by legislation, that require considerable change to the way that social work services are provided. These include:

- **Increased personalisation of services** – Personalisation of services, for example through self-directed support (SDS), is a major change to the way councils support people with social care needs. The human rights principles of fairness, respect, equality, dignity and autonomy for all form the basis of SDS. Social work professionals need to see people as equal partners in determining their care needs and controlling how they meet their needs. This means they are not limited to choosing from existing services. Social work services may need to move spending away from existing services towards giving people their own budget to spend. This can lead to a reduction in use of some services. However, it can be difficult for councils to withdraw existing underused services because of public and political pressures.
- **An increased focus on prevention** – The report from the Commission on the Future Delivery of Public Services (the Christie Commission) highlighted the need to transform the way public services are planned and delivered.¹² The report identified prevention, early intervention and providing better outcomes for people and communities as key to this transformation.
- **An increased focus on joint working** – A series of initiatives over recent years has aimed to encourage a more joined-up approach to health and social care. These include the creation of Local Health Care Cooperatives (LHCCs) in 1999, and their replacement by Community Health Partnerships (CHPs) in 2004. LHCCs and CHPs lacked the authority to redesign services fundamentally.¹³ The Public Bodies (Joint Working) (Scotland) Act 2014 aimed to achieve greater integration between health and social care services to improve outcomes for individuals and improve efficiency by ‘shifting the balance of care’ from the acute sector to community settings.

14. New legislation often has financial consequences and, to allow MSPs to consider the full impact of legislation, a financial memorandum to each Bill sets out the estimated cost of implementation. These are the best available estimates at the time, but have sometimes proved inaccurate. The Scottish Government may fund or partially fund these costs but councils sometimes dispute these estimates and the level of funding required.

15. New legislation can also affect how councils deliver services by creating entitlements to services based on specific criteria. Councils need to respond to these and manage the expectations of people who use services and carers. These entitlements can be based on needs assessments, or on the expected outcomes, or they can create rights to services for particular groups. Transitions are important as entitlements change depending on age. For example:

- Children have the right to specific support that adults may not have. As a result, councils have to be careful in managing the expectations of parents as children reach adulthood.
- People aged over 65 may be entitled to free personal care, but 64-year-olds with similar needs may have to make a financial contribution to their care.

I receive 37 hours of support and seven sleepovers. I get personal care, support with the running of my flat, to shop and support to be involved in the community. They also enable me to attend university.

Service user, physical disabilities

When [grandchild] turned 16 I was told that this Saturday service was going to stop because he would now be under adult services. I had no forewarning, no-one from adult services contacted me; I contacted them and they couldn't offer any support. It's a funding issue.

Carer

Social work services face significant demographic challenges

16. The impact of demographic change on health and social care spending has already been well reported.¹⁴ Between 2012 and 2037, Scotland’s population is projected to increase by nine per cent. All parts of the population are projected to increase, but by different amounts:

- the number of children by five per cent
- the working age population by four per cent
- the number of people of pensionable age by 27 per cent.¹⁵

17. Overall demand for health and social care will depend significantly on the number of older people and the percentage who require care. Although life expectancy continues to increase, healthy life expectancy (HLE), that is the number of years people can expect to live in good health, has not changed significantly since 2008 ([Exhibit 3](#)). This means that a larger number of older people may require support for longer, unless HLE increases. Councils and the Scottish Government have taken steps to try to increase HLE. This includes measures to reduce smoking, alcohol consumption and environmental pollution and providing information to the public about the benefits of a healthy lifestyle.

Supporting looked-after children and child protection has increased demand on social work services

18. Looked-after children (LAC) are children in the care of their local authority. They may live in their own home, with foster or kinship carers or in a residential

Exhibit 3

Changes in life expectancy and healthy life expectancy

Life expectancy is increasing faster than healthy life expectancy, potentially increasing service pressures.

Note: Data on healthy life expectancy was not collected annually until 2008.

Source: Scottish Health Survey, Scottish Household Survey, National Records of Scotland births, deaths and populations data

home. Most become looked after for care and protection reasons. The term also includes unaccompanied children seeking asylum and young people who have been illegally trafficked. As at July 2015, 17,357 children in Scotland, around 1.8 per cent of the total, were looked after or on the child protection register.^{16,17} Of these 15,404 were looked after, 2,751 were on the child protection register and 798 were both looked after and on the register. While there has been a recent reduction, possibly due to improvements in prevention, the number of LAC has increased by 36 per cent since 2000, although the numbers and trends vary among councils. The number of children on the child protection register increased by 34 per cent between 2000 and 2015, with three in every 1,000 children under 16 now on the register. In smaller councils, the number of children on the register (and resultant workload) can fluctuate significantly, particularly when sibling groups in large families are registered.

19. The reasons for these increases are likely to be complex. Many of the councils we visited think that increases in drug and alcohol use by parents are important factors. Others have seen an increase in reporting of domestic abuse and alcohol-related incidents in more affluent areas that might have gone unreported in the past. In addition, early intervention policies are likely to have led to an increase in the number of looked after children, but a decrease in the time that councils look after them. Early intervention means identifying people at risk and intervening to prevent the risk. Between 2007 and 2014, the number of children removed from the register who had been on it for less than a year increased from 2,421 (79 per cent of the total) to 3,930 (87 per cent). Over the same period, the number of children who had been on the register for more than a year fell from 663 to 569.

Councils and service providers face difficulties in recruiting staff

20. Just over 200,000 people work in social work and social care services, representing around one in 13 people in employment in Scotland.¹⁸ Almost half work part time and 85 per cent are women. The private sector is the biggest employer (42 per cent of staff), followed by the public sector (31 per cent) and the third sector (28 per cent). This distribution varies considerably among councils, and the public sector is the biggest provider in the three island authorities.

21. Many third and private sector providers raised staff recruitment as a significant issue for them. Councils have fewer recruitment problems, the exception being in remote rural areas, where it can be difficult to recruit specialised staff. Third and private sector providers reported that the apparent causes for these difficulties included:

- **Low pay** – providers in both the private and third sectors felt that the rates councils pay under their contracts only allowed them to pay staff at, or near, the minimum wage. In addition, travel time between clients is sometimes unpaid.
- **Antisocial hours** – providing homecare often requires carers to assist people to get out of bed in the morning and into bed at night. This can mean weekend working, split shifts and antisocial hours, with no additional pay. The increased personalisation of care has contributed to this as carers increasingly provide care to suit individuals, rather than fitting individuals into the care system.

Driving down costs to the extent that staff are recognised as being in a 'low wage sector' increases the problem of recruitment.

Service provider

- **Difficult working conditions** – staff have to take care of people with a variety of care needs that some find difficult, for example, assisting people with bathing and personal hygiene, or who have dementia or incontinence.

22. The cycle of continually recruiting and training staff is costly and could potentially have an impact on the quality of services provided. Service provider focus groups highlighted a need to provide staff with a sustainable career path to improve recruitment and retention. Overall, the public sector has the most stable workforce and the private sector the least, although this does not appear to be the case for all categories of staff ([Exhibit 4](#)).¹⁹

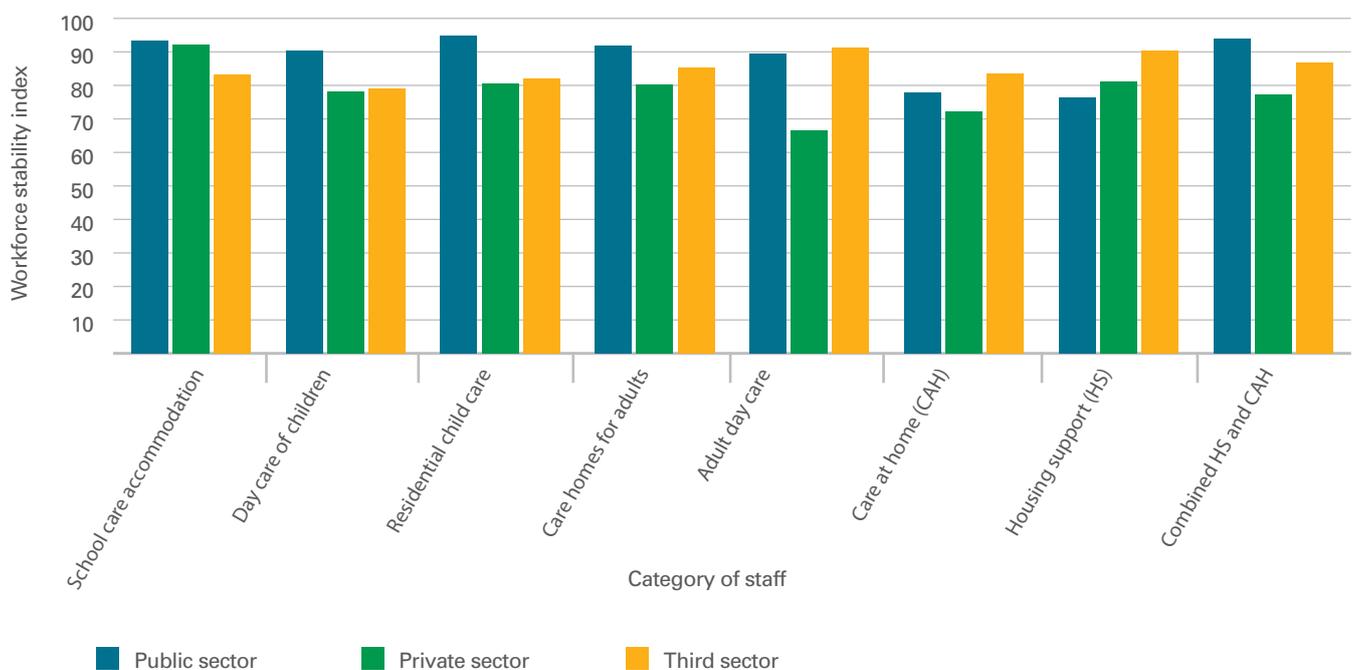

23. Some care providers expressed concerns that leaving the EU and the potential introduction of a points-based immigration system could create problems for staff recruitment. A 2008 workforce survey indicated that 6.1 per cent of the social care workforce in Scottish care homes for older people were EU – non-UK workers, and a further 7.3 per cent were employed under work permits. Most of those employed from within the EU came from Poland and the Czech Republic and those from outside the EU were from the Philippines, India and China.²⁰

24. Four per cent of the workforce have a no guaranteed hours (NGH) contract.²¹ When combined with the other contract types that may be considered a zero hours contract (bank and casual or relief), they comprise roughly ten per cent of the contracts in the workforce. Providers believe zero hours contracts are

Exhibit 4

Social work workforce stability 2013/14

The public sector workforce is generally the most stable.

Note: Because of data limitations, the SSSC cannot provide an accurate estimate for turnover. However, they are able to calculate a 'stability index' of staff who are still in post after a year. If the index is 90 per cent it means that 10 per cent of staff present at the start of the period are no longer present. It is important to note that this does not mean that turnover is 10 per cent as the measure excludes staff who joined and left within the period under consideration.

Source: Scottish Social Services Council (SSSC)

essential to provide a flexible and personalised service to people, while also providing flexibility for staff. These contracts are suitable as long as they are not exclusive and staff are free to accept or turn down work without being penalised. As part of good contract management, councils should ensure that providers use zero hours contracts properly.

25. There are skills and staffing shortages in several areas of social work and social care, including:

- **Homecare staff** – 69,690 people work in housing support or care at home.²² Both third sector and private sector providers find it difficult to recruit staff. Rapid staff turnover is a significant threat to maintaining service standards, particularly in adult day care.
- **Nursing staff** – 6,620 registered nurses work in the care sector, 4,930 of them in adult care homes. Ninety-one per cent of registered nurses are in the private sector. Care providers in both the private and third sectors are having trouble recruiting qualified nursing staff for care homes. As a result, providers were trying to recruit staff from outside the UK. Although data is not collected on vacancy rates for nursing staff in the care sector, there were 2,207 whole-time equivalent (WTE) vacant nursing and midwifery posts in the NHS in Scotland at 31 March 2016.²³
- **Mental health officers (MHOs)** – are specialist social workers with a statutory role in the detention and treatment of people with mental illness. They look into the circumstances of individuals where people have concerns about their mental health. They can apply for a court order that would allow an individual to be taken to a ‘place of safety’ for up to seven days.²⁴ In December 2014, the number of registered MHOs was at its lowest level since 2005. However, in 2015 there was a small increase (two per cent) to create a total of 670 practising MHOs. In 2015 there were 15 unfilled posts for MHOs in Scotland and 17 further post holders who were unavailable, for example through career breaks or secondments, about five per cent of the total.²⁵

The professional social work role is changing

26. The workforce includes 11,127 professional social workers registered in Scotland. Almost three-quarters, 8,242, work in councils and 2,040 (18 per cent) are employed by other providers. Most of the rest are self-employed, unemployed or recently retired. Not all qualified social workers work in roles where they are required by law to hold a social work qualification (statutory roles), for example they may work in management roles. The number of WTE social workers employed by councils in statutory roles increased significantly between 2001 and 2015, from 3,873 to an estimated 5,630. Of these, 31 per cent work with adults, 49 per cent with children, 15 per cent in criminal justice; five per cent work generically.²⁶

27. The majority of social workers in our focus groups were optimistic about their role and their ability to make a positive difference to people’s lives. Changes in structural and partnership arrangements in health and social care have introduced more working in multidisciplinary teams, for example with health visitors or occupational therapists. Social workers sharing offices with other disciplines can be both rewarding and effective. We found that social workers who had worked in multidisciplinary teams for some time were convinced that improved

communication with community NHS staff had improved services. However, some were concerned about erosion of their professional identity. Moreover, adapting to working with colleagues from a different culture, for example in approaches to risk, could be challenging.

Unpaid carers provide the majority of social care in Scotland

28. The Scottish Government estimates that there are 759,000 unpaid carers aged 16 and over in Scotland, around 17 per cent of the adult population. Of these, 171,000 (23 per cent) provide care for 35 hours or more a week. In addition, there are an estimated 29,000 young carers under 16, around four per cent of the under 16 population.²⁷ There are many more unpaid carers providing support to people than those in the paid social services workforce.

29. In 2010, the Scottish Government reported that unpaid carers saved health and social services an estimated £7.68 billion a year.²⁸ More recently, Carers UK estimated the value of unpaid care in Scotland to be £10.8 billion, more than three times current social work net spending.²⁹

30. The Carers (Scotland) Act 2016 became law in March 2016. It provides for the planning and provision of support, information and advice for unpaid carers and encourages councils to become involved in carers' services. It also means councils are required to prepare a carer support plan for carers, including young carers, who want one. A carer support plan sets out information about the carer's circumstances, the amount of care they are able and willing to provide, the carer's needs for support and the support available. The Act also requires each council to establish and maintain an information and advice service for carers who live or care for people in its area.

Social work services are facing considerable financial pressures

31. In 2014/15, councils' net spending on social work services was £3.1 billion (**Exhibit 5, page 21**). Services for older people made up around 44 per cent of this spending, and services for children and families around 28 per cent. A range of other services make up the remainder.

32. In 2016/17, councils' total revenue funding, that is the funding used for day-to-day spending, will be five per cent lower than in 2015/16. This is a reduction of 11 per cent in real terms since 2010/11.³⁰ This is a significant pressure on all council services, including social work. The 2016/17 figure does not include £250 million that the Scottish Government allocated to health and social care integration authorities to support social care, because the Scottish Government routed it through the NHS boards' budgets rather than council budgets.

33. Against the trend of falling council spending, councils' total social work net spending increased in real terms from £3.2 billion to £3.3 billion between 2010/11 and 2014/15, an average increase of 0.8 per cent a year.³¹ As a result, spending on social work increased from 28.9 per cent to 32 per cent of council spending.³² An analysis of council accounts found that two-thirds of councils reported social work budget overspends totalling £40 million in 2014/15. Most councils identified homecare services for adults and older people as the service under most pressure.

(Unpaid) Carers do everything! Link everything! Anchor everything!

Exhibit 5

Social work spending, 2014/15

Around 44 per cent of the £3.1 billion net social work spending is on services for older people and this percentage is likely to increase with demographic change.

Source: Local Government Financial Statistics 2014-15 (Annex A), February 2016

34. There have been significant long-term changes in spending per head among different age groups ([Exhibit 6, page 22](#)). The reduction in spending on older people is a combination of a lower percentage of older people receiving services ([paragraph 46](#)) and a reduction in the real-terms cost of care homes ([paragraph 62](#)) and homecare ([paragraph 59](#)). The increase in spending on children and families may be related to an increase in the number of looked after children, an increase in the complexity of children and families' cases and an increased focus on early intervention.

Few councils and IJBs have long-term spending plans for social work

35. We examined council budgets and spending plans for 2015/16, 2016/17 and beyond to assess whether the trends identified above are likely to continue in the medium term. Budget information is more difficult to collect and interpret than historic expenditure information because councils do not present this information consistently. In addition, most IJBs had not finalised their budgets at the time we were conducting our analyses. Budgets for 2016/17 were very similar to 2015/16 in cash terms. We also analysed councils' savings plans. Councils plan to save £54 million from social work budgets in 2016/17, mainly through changing how they provide services, reducing services and making efficiency savings.

Exhibit 6

Real-terms spending on social work services per head, 2003/4 to 2013/14

Source: Expenditure on Adult Social Care Services, Scotland, 2003/4 to 2013/14, Scottish Government

36. Councils and NHS boards work on different financial planning cycles and agree budgets at different times of the year. A survey of IJBs by the Scottish Parliament's Health and Sport Committee found that over half of IJBs were unable to set a budget for 2016/17 before June 2016, and over a quarter before August 2016.³³ A number of responses mentioned delays in receiving the health allocation for the partnership as a cause of difficulty in setting budgets. If councils and NHS boards continue with different budget cycles, it will make it more difficult for IJBs to agree budgets for services in a timely way.

37. In February 2016, as part of the local government settlement, the Scottish Government announced funding of £250 million to support social care for the three years to 2018/19. Some of this funding was to help pay the Living Wage (£8.25 an hour) to all care workers in adult social care, regardless of age from 1 October 2016.

38. The Living Wage Foundation sets the Living Wage. It is up-rated annually and they will announce a new rate in November. The local government settlement does not require councils to increase wages to the new Living Wage rate when the Living Wage Foundation announces it in November.

39. The Scottish Government has estimated that over the period 2012-32, spending on social care for older people will need to increase by between 1.5 per cent and 3.3 per cent a year, depending on changes to healthy life expectancy (HLE).³⁴ We have calculated lower and upper limits of the cost of demographic change based on Scottish Government projections. Added to this are cost pressures arising from legislation, based on their financial memorandums, and the cost implications of the commitment to the Living Wage for care workers ([Exhibit 7](#)).³⁵

Exhibit 7

Potential financial pressures facing Scottish councils by 2019/20

Councils face significant cost pressures.

Reason for cost increase	Lower limit (£ million)	Upper limit (£ million)
 Demographic change (older people only)	£141	£287
 The Children and Young People (Scotland) Act 2014	£98	£98
 The Carers (Scotland) Act 2016	£72	£83
 The Living Wage	£199	£199
Potential cost increase by 2019/20	£510	£667

Source: Audit Scotland analysis of financial memorandums and information provided by the Scottish Government

40. Together they imply increases in social work spending of between £510 and £667 million (a 16–21 per cent increase) by 2019/20. Additional Scottish Government funding to implement legislation and to IJBs (via the NHS) may partially relieve some of these pressures, as could potential savings from health and social care integration and by providing services differently.

41. Councils and IJBs need to develop longer-term financial strategies and plans for social work services, taking into consideration the above financial pressures. For example, they need to assess the affordability of options for changing the way they deliver services, so that elected members can consult the public and make informed decisions. Some of the councils we visited had already done this. For example, West Lothian Council had detailed projections of cost pressures for the client groups in social work and had considered the options available to meet those pressures depending on the level of funding available.

Part 2

How councils are addressing the challenges

Key messages

- 1 Councils have adopted a number of strategies to achieve savings. They have tightened eligibility criteria so that fewer people receive services and targeted funding to people in greatest need. They have also achieved significant savings in the cost of homecare and care homes through competitive tendering and the national care home contract.
- 2 Current approaches will not be sustainable given the scale of the challenge, and there are risks that reducing costs further could affect the quality of services. Fundamental decisions are required on long-term funding and social work service models for the future.
- 3 There has been a limited shift to more prevention and different models of care. Many councils have taken an opportunistic or piecemeal approach to changing how they deliver services, often to meet financial challenges or as the result of initiative funding by the Scottish Government.
- 4 Opportunities for people who use social work services and carers to be involved in planning services are limited. There is scope for councils and IJBs to do more to work with them to design, commission, deliver and evaluate services to achieve better outcomes. Service providers also have an important role to play in commissioning services, and councils are not doing enough to work with them to design services based around user needs.
- 5 People who use services and their carers value the support they get from social work and social care services. Our focus groups had a number of concerns about homecare, such as shorter visits and people using services seeing a number of different carers.
- 6 The Scottish Government's Living Wage commitment provides an opportunity to improve recruitment and retention of social care staff, and to create a more stable skilled workforce. But it adds to the financial pressures on councils and providers.

fundamental decisions are required on long-term funding and social work service models for the future

Councils, COSLA and the Scottish Government have agreed approaches intended to address major long-term pressures

42. Social work services operate within a number of national strategies, developed by the Scottish Government and councils that are intended to

respond to the major challenges set out in [Part 1](#), such as demographic change, personalisation and prevention. These include:

- **Social Services in Scotland: a shared vision and strategy for 2015-2020** – this builds on the *21st Century Social Work Review* published in 2005. It covers the whole of social work and its aims include:
 - encouraging a skilled and valued workforce
 - working with providers, people who use services and carers to empower, support and protect people
 - a focus on prevention, early intervention and enablement.³⁶
- **The 2020 Vision for Health and Social Care in Scotland** envisages that by 2020 people will live longer healthier lives at home, or in a homely setting and that Scotland will have an integrated health and social care system with a focus on prevention and supported self-management.³⁷
- **Reshaping Care for Older People (RCOP)** – a ten-year change programme focused on giving people support to live independently in their own homes and in good health for as long as possible. In 2011/12, the Scottish Government introduced the Change Fund, totalling £300 million to 2014/15, specifically to develop this area of policy.³⁸

43. Our report, *Reshaping care for older people* commented on slow progress of RCOP and the need to monitor its impact. It also reported that initiatives are not always evidence-based or monitored and that it was not clear how councils would sustain and expand successful projects.³⁹ Our report *Changing models of health and social care* concluded that the shift to new models of care is not happening fast enough to meet the growing need, and the new models of care that are in place are generally small-scale and not widespread.⁴⁰

Councils have changed eligibility criteria to reduce the number of people who qualify to receive services to balance their budgets

44. Councils have a statutory duty to assess people’s social care needs. If they assess a person as needing support and eligible to receive services, they must provide or pay for services to meet these needs.⁴¹ If people are eligible for support, the Social Care (Self-Directed Support) (Scotland) Act 2013 also requires councils to offer people a choice of four options in how their social care is provided:

- a direct payment – this allows people to choose how their support is provided, and gives them as much control as they want over their individual budget
- direct the available support – the person asks others to arrange support and manage the budget
- the council arranges support – the councils choose, arrange and budget for services
- a mix of all the above options.

45. To balance their budgets, councils prioritise funding and staff to those people most in need by setting eligibility criteria and assessing each person’s needs against these criteria. Councils have discretion on the thresholds for care they use locally. The level set in each council will depend on the resources available and

I have a say about who is on my team. I got to meet them and do interviews. I did the questions in advance.

Service user, young person with physical disabilities

on the council's policies and priorities. Councils assess people's needs using a common framework of four eligibility levels:

- **Critical Risk (high priority)** – Indicates major risks to an individual's independent living or health and wellbeing likely to require social care services 'immediately' or 'imminently'.
- **Substantial Risk (high priority)** – Indicates significant risks to an individual's independence or health and wellbeing likely to require immediate or imminent social care services.
- **Moderate Risk** – Indicates some risks to an individual's independence or health and wellbeing. These may require some social care services that care providers manage and prioritise on an ongoing basis, or they may simply be manageable over the foreseeable future with ongoing review but without providing services.
- **Low Risk** – Indicates that there may be some quality of life issues, but low risks to an individual's independence or health and wellbeing with very limited, if any, requirement for social care services. There may be some need for alternative support or advice and appropriate arrangements for review over the foreseeable future or longer term.⁴²

46. Because of funding pressures, most councils now only provide services to people assessed as being at critical and substantial risk. Focusing services on people with higher levels of need resulted in a reduction in the percentage of older people receiving homecare between 2006 and 2015, from just under 70 per 1,000 population to 50 per 1,000 ([Exhibit 8](#)). Of the councils we visited, only West Lothian still provides services to people assessed as at moderate risk.

Exhibit 8

Proportion of people aged 65+ receiving homecare, 2006 to 2015

The proportion of people aged 65 and over receiving homecare has fallen from just under 70 per 1,000 to just over 50 per 1,000.

Source: Expenditure on Adult Social Care Services, Scotland, 2003-04 to 2013-14, Scottish Government

47. Because most councils no longer provide services to people in the two lower risk eligibility criteria, and because of the considerable financial and legislative changes in social work since the current framework was developed, it may be an opportune time for COSLA and councils to review the framework to ensure that it is still fit for purpose.

48. Some councils have also limited the level of service they provide in some areas. Examples from our fieldwork include reducing the length of carer worker visits, providing ready meals and frozen meals, with one hot meal per day (leaving snacks for other meals) and restricting showers to once or twice a week for some people.

Councils are finding it hard to fund a strategic approach to prevention

49. Developing a strategic approach to prevention is essential for councils to sustain provision of social services. In 2011, the Christie Commission concluded that Scotland needed to 'devise a model of public services that is both financially sustainable and is capable of meeting the significant longer-term challenges'. It also proposed that a radical shift towards preventative public spending was essential. In September 2011, the Scottish Government set out an ambitious vision to enable everyone to live longer, healthier lives at home or in a homely setting by 2020.⁴³ Central to the vision is a focus on prevention, anticipation and supported self-management. The Scottish Government also set up change funds to stimulate prevention work, specifically in the areas of early years, re-offending and re-shaping care for older people.

50. Councils, IJBs and other stakeholders all believe that prevention is the key to meeting the growing demands for social work services within finite resources. However, the councils we visited varied in how well they are developing and implementing preventative strategies. Some, including West Lothian and East Renfrewshire, have a strong focus on prevention, for example they maintain prevention budgets and build prevention into how they plan and provide services. Councils cited various challenges to shifting service models towards prevention:

- a lack of funding because resources are locked into current service models to meet existing demands and savings may not materialise for several years after implementation
- a lack of social worker time – a concern that social work has become crisis based
- managing relatives' expectations – for example, some relatives prefer the council to provide a full care package of residential care rather than have their relation go through a re-ablement programme to allow them to live more independently at home
- community resistance – for example, opposition to closing a local hospital or care facility to free up funding for more accessible community-based care
- cultural differences between councils and the NHS – a common perception among a number of social workers in our focus groups is that the NHS is more risk averse and less used to giving staff responsibility to take the initiative on the care of individuals.

I had an OT (occupational therapy) assessment, and social work and they gave me 15 minutes of care. It's really not enough time. It's the choice between getting washed or getting dressed

Service user,
physical disabilities

51. Councils have commonly adopted some prevention initiatives, most of which are effective in the short term, but examples of long-term initiatives are more limited. Common prevention activities included:

- **Re-ablement** – involves encouraging people using services (often people leaving hospital) to develop the confidence and ability to live more independently and be less reliant on social care. This is usually a six-week programme of intensive help; it commonly results in people requiring less or even no ongoing support. Glasgow City Council found that 30 per cent of clients had no further need of a service following a period of re-ablement. The change fund initially funded this project but the council now funds it as the savings justify the investment.
- **Using technology** to enable people to continue living in their own homes for longer and to give reassurance to their carers and families. All councils provide a community alarm service. More advanced telecare systems use movement sensors and smoke detectors to alert the service to potential problems or prompt people to take medication. For example, West Lothian Council uses technology to help people with dementia, their families and carers manage issues that may arise in and around the home. Examples include:
 - a GPS device to help relatives or carers to find a vulnerable person if they get lost
 - extreme temperature and flood sensors fitted in kitchens
 - sensors to alert a carer when the person gets out of bed
 - removable sensors, called 'just checking', placed at doorways to monitor movement and assess lifestyle patterns.
- **Early intervention for children and families** is another widely implemented approach. Social work services work with relevant partners to support children and families at risk of needing support that is more intensive in future, or with older children at risk of becoming an offender. Midlothian Council attributed a significant drop in the number of their children on the child protection register from 158 in 2011 to 29 in 2015, at least partially, to early intervention and prevention work.⁴⁴
- **Restricting out of area service for looked-after children** – out of area placements tend to involve young people with troubled histories and challenging behaviour and children with significant learning disabilities. Some out of area placements will be the most suitable for a child, such as where the child has complex treatment needs that the council cannot meet or to ensure they can be effectively safeguarded. However, such placements are very expensive (weekly fees to independent providers range from £800 to £5,500) and can have negative consequences. For example, children may try to run away, putting themselves at risk, and children away for long periods will lose contact with their peers and find it difficult to re-integrate into the local community when they leave care.⁴⁵ Our fieldwork councils reported that keeping children local to their communities, for example in supported foster placements, could achieve better outcomes for children and achieve considerable financial savings for the council.

I have a feature that picks up if I get out of bed for too long, in case I've fallen in the night. I like to get up and wander about if I can't sleep, and then there is this booming voice asking if I am OK! It's a first class service.

Service user, older person

Councils need to measure the impact of prevention initiatives more systematically

52. Measuring and evaluating the success of prevention work is difficult. By its very nature, it is not easy to quantify what has not happened because of

prevention. It is also hard to attribute outcomes to specific courses of action in an environment where many factors are involved. Even so, councils do not always systematically evaluate initiatives, and there is a risk that opportunities for improvement, making savings or stopping ineffective activity are lost. Councils and IJBs should bring together information on the evaluation of successful prevention initiatives. They can use this to make long-term strategic investment decisions towards prevention as a key part of their long-term budget planning, rather than relying on short-term initiative funding as at present. Prevention needs to be seen as an integral part of councils' and IJBs' overall long-term strategies for services they can continue providing over the long term, rather than an add-on financed by short-term funding.

53. In our fieldwork, we found examples of successful evaluation. An evaluation of Glasgow's Recreate service to support ex-offenders found that in 2014/15 it generated a Social Return on Investment of between £6.14 and £9.54 per £1 invested ([Case study 1](#)).⁴⁶

Case study 1

Glasgow Recreate

This service gives ex-offenders the chance to volunteer for up to six months in meaningful roles where they gain new skills and experiences to help them to move forward in their life. Volunteers can access various opportunities, including landscaping and gardening, painting and decorating, retail and warehousing, and woodwork.

With the support of skilled tradespeople, they work on projects for organisations such as community groups, charities, housing associations, and Glasgow Land and Environmental Services. Each volunteer has a dedicated mentor who helps them to access additional volunteering opportunities, housing support, employability services, and money advice and make positive changes in their personal life. They also help volunteers to complete CVs, identify training and development needs, and set goals to help them become more work-ready to help them break the cycle of re-offending.

Volunteers benefit from rail, bus and subway travel, lunch, gym membership, training and development, information about other organisations, and employment support. During 2015/16, there were 58 volunteers in the scheme (up from 34 in 2013/2014), 57 per cent of whom moved into employment. Ninety-six per cent of participants did not re-offend and of those who did, the frequency and severity of the offending was reduced.

Source: Glasgow City Council

Recreate is a good mix of volunteering, learning and mentoring. I worked hard and it paid off.

Recreate volunteer

54. Some councils are learning from experience elsewhere to tackle particular issues. For example, East Renfrewshire Council visited Shropshire County Council to explore how it developed a community-led social work service. It has agreed to be one of three organisations that will pilot the programme in Scotland. There is scope for councils to do more to look at what others are doing, nationally and internationally, and share experience and learning.

Councils have achieved savings through competitive tendering

Councils purchased around £1.6 billion of services in 2014/15

55. Currently, councils spend around £1.6 billion a year on outsourced social care services, roughly two-thirds to the private sector and a third to the third sector (**Exhibit 9**). Spending on private sector services is mainly to provide homecare, residential care and nursing homecare for older people (£800 million). Most third sector spending is to provide services for children with disabilities (£244 million). Larger providers provide services across a large number of councils and are in a good position to identify good practice.

56. In procuring services, councils need to take into account the long-term financial viability of care providers. Providers could be put at risk by a combination of several factors, including:

- a fall in the number of care home residents
- increased paybill costs because of knock-on impacts of Living Wage
- increased uncertainty following Brexit may make it difficult for private sector providers to finance capital investment, such as building or refurbishing care homes.

Exhibit 9

Breakdown of contracted out social care spending by sector, 2014/15

Most private sector services are for adults while the third mostly sector provides services for children.

		Third sector £'000	Private sector £'000	Total £'000	
Social care adult		Day care	43	1,156	
		Homecare	18,290	279,693	
		Mental health services	14,297	27,272	
		Nursing homes	19,273	337,649	
		Residential care	1,883	219,962	221,845
Social care children		Adoption	23,208	59,079	
		Childcare services	49,481	79,698	
		Domestic violence	3,229	44,740	
		Children with disabilities	243,878	17,831	261,708
Social care other			195,945	112,363	308,308
Total		569,527	1,051,621	1,621,148	

Note: 'Other' includes advice and counselling services, advocacy service providers, alcohol and drug rehabilitation, community centres, community projects, disability and special needs service providers.

Source: Spikes Cavell database

57. Councils and Scotland Excel need to monitor the financial health of providers as part of their contract monitoring activity. The failure of a provider could have significant consequences for care services as well as people who use care services because Section 12 of the Social Work (Scotland) Act 1968 places a duty on Scottish local authorities to provide or arrange care for any individual in their area who requires assistance in an emergency.

Competitive tendering has reduced the cost of homecare

58. Councils have achieved significant financial savings through outsourcing services such as homecare to the private and third sectors through competitive tendering and re-tendering contracts. The percentage of homecare provided directly by council staff has fallen steadily, both in terms of the number of clients served and the number of hours provided ([Exhibit 10, page 32](#)).

59. Between 2010/11 and 2014/15, the average cost of providing homecare to people aged over 65 fell by 7.2 per cent in real terms, to £20.01 per hour.⁴⁷ An unintended consequence of driving down spending is increased staff turnover, as private and third sector providers employ staff on poorer terms and conditions than some other large employers or councils.

60. Third sector and private sector providers in our focus groups described some councils' procurement processes as inefficient and wasteful. They highlighted inconsistencies in how councils used framework agreements. These are agreements with suppliers to establish the terms that will govern contracts that councils may award during the life of the agreement.⁴⁸ Some private sector providers were concerned that they had invested time and money in signing up to frameworks, only to find that councils did not use their services.

Councils have made savings in the cost of care home services

61. The National Care Home Contract sets out the cost to councils of care home placements into private or third sector care homes. COSLA negotiates the fee structure annually with the representative bodies for private and third-sector providers in Scotland.⁴⁹ These bodies are Scottish Care and the Coalition of Care and Support Providers in Scotland. The contract includes an additional payment for care homes doing well in Care Inspectorate assessments, with penalties for poorly performing homes.

62. Between 2006 and 2015, the number of residents in older people's care homes decreased by two per cent (from 33,313 to 32,771).⁵⁰ The net cost of residential care (gross expenditure on care homes minus income) to councils has been falling. Between 2010/11 and 2014/15, the weekly residential costs to councils for each resident aged 65 or over fell by ten per cent in real terms to £372.⁵¹

63. The pattern of service provision has changed, with an increase in private sector provision and a fall in other sectors. Between 2006 and 2015, the change in the number of older people in residential care in each sector was:

- private sector – increased by five per cent (24,568 to 25,700)
- local authority/NHS – decreased by 23 per cent (4,876 to 3,747)
- third sector – decreased by 14 per cent (3,869 to 3,324).⁵²

Too many (paid) carers – regular new carers needing shown ropes again! Gah!!

Unpaid carer

64. The percentage of adults in care homes who mainly pay for their own care is increasing; the percentage increased from 22 per cent of residents in 2006 to 27 per cent in 2015.⁵³ In 2015, the average gross weekly charge for people who paid for their own care was £708, compared with the average weekly fee for publicly funded residents of £508.⁵⁴

Service providers want to be more involved in commissioning services

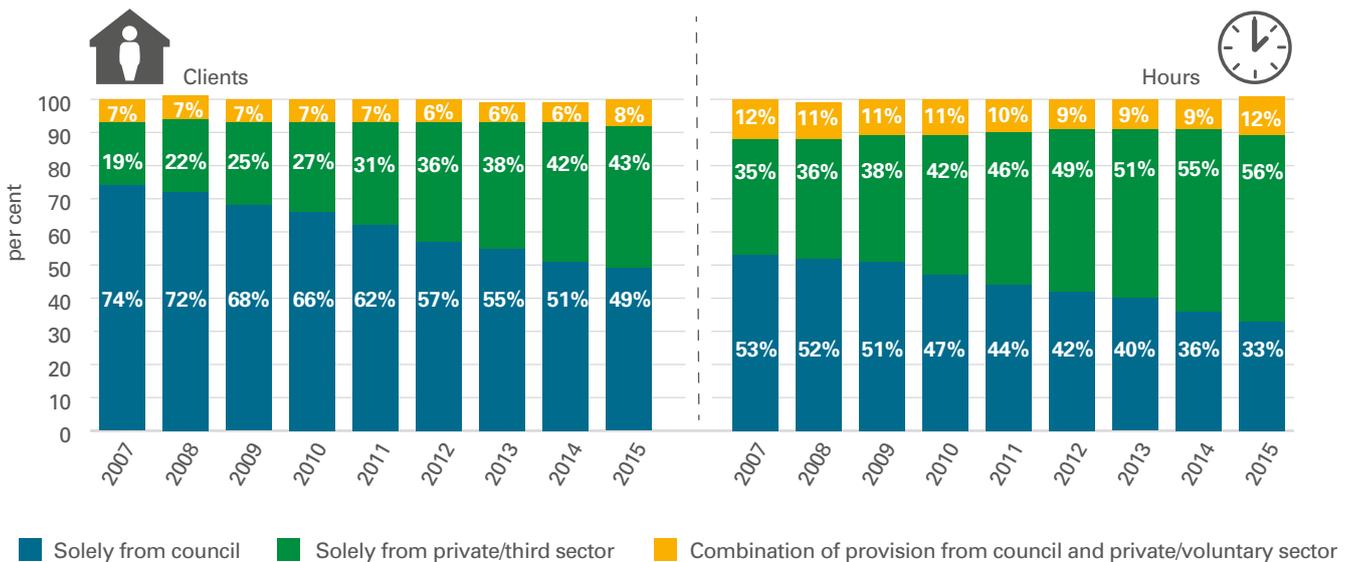

65. Commissioning social care is about how councils, NHS boards and others work together to plan and deliver services that will meet future demands and use resources, such as money, skills and equipment effectively. Jointly planned investment in home or community-based social care can save spending on unnecessary, and relatively expensive, hospital or residential care, and encourage innovation. The Christie Commission concluded that it is particularly important to:

- work closely with individuals and communities to understand their needs, maximise talents, resources, and support self-reliance, and build resilience
- recognise that effective services must be designed with and for people and communities – not delivered ‘top-down’ for administrative convenience
- maximise scarce resources by using all available resources from the public, private and third sectors, individuals, groups and communities.

Exhibit 10

The share of homecare provided by councils and the private/third sector, 2007 to 2015 (all ages)

Homecare provided directly by councils has fallen steadily over the past ten years.

Source: Social care services, Scotland, 2015, Scottish Government, December 2015

66. Councils have a challenging task to manage the market for providing services in their local area. There are potential tensions around making savings while ensuring high-quality services at a fair cost in an environment of increasing demand and financial pressures. There are risks to the quality of services if councils continue to drive down costs at the rate they have in the past without changing how they provide services.

67. Service providers from our focus groups who work across more than one council area found that different councils have different processes, procedures and attitudes to partnership working. They identified commissioning and procurement as common areas for improvement. In particular they felt that councils should:

- ensure they have staff with the appropriate skills for commissioning, such as financial planning and managing contracts, and be open in commissioning and contract decision-making processes. Some participants complained about unnecessary bureaucracy, noting gaps in expertise and risk appraisal and a lack of awareness of the challenges facing providers, for example the cost of employing qualified and experienced staff
- collect evidence about the effectiveness of all services (both in-house and external) and use this evidence in planning and decision-making. Councils face difficult choices, but providers felt councils sometimes protected their in-house services and workforce while cutting externally provided services, without comparing cost-effectiveness
- improve partnership working and relationships with providers. Although there were pockets of good practice, providers suggested that councils needed to work more collaboratively to provide stability to both those who provide and those who use services
- involve providers more in assessing and designing services, taking advantage of the experience and knowledge of good practice that larger providers have gained from working with councils across the UK.

68. One innovative example we identified was the Public Social Partnerships (PSP) approach used at East Renfrewshire Council ([Case study 2, page 34](#)). PSPs are strategic partnering arrangements, based on a co-planning approach. In this instance, the council worked with third-sector organisations and people who use services to share responsibility for designing services based around the needs of those who use them. Once designed, the council can then commission the service for the longer term. Several service providers in our focus groups mentioned the inclusive approach taken by East Renfrewshire Council as an example of good practice in commissioning services. It is important that councils have effective means of sharing good commissioning practice and working with practitioner groups within national organisations, such as COSLA and Social Work Scotland.

Some councils think 'out of the box', others are in a box with a very large padlock!

Service provider

We are left out of planning discussions while having to deal with the consequences of decisions made by councils.

Provider focus group

Case study 2

East Renfrewshire Council: innovation in commissioning services

The Public Social Partnerships approach is a two-year funded programme, supported by the Scottish Government and designed to develop creative ideas for meeting the needs of people in, or about to enter, residential care. The partnership is across sectors and between people who use services. It is designed to develop thinking and support innovation. Participation in the project also helps to build resilience in people and communities by focusing on what people want rather than the services they currently receive. The illustration below describes one of the outputs from the process showing a visualisation of residential care from the point of view of someone who uses services.

Source: East Renfrewshire Council

People who use services, and carers, would value being more involved in planning how services are provided

69. The Christie Commission recognised the importance of people being involved in designing services to meet their needs. This approach is now supported by legislation such as the Community Empowerment (Scotland) Act 2015 and the Carers (Scotland) Act 2016.

70. People in our focus groups, both carers and people using services, valued the support they receive from social work services. Several said that without support they would not be able to cope or maintain employment. Feedback from our survey of 165 people indicated that the type of service provided determined whether service users felt able to influence their service delivery. For example, where service users had one-to-one support or had close relationships with staff in sheltered accommodation, they felt confident about influencing the service.

71. However, a significant number of service users felt that they had little influence over their social care provision. Some had concerns about speaking up in case the care they received was reduced or changed. Others, particularly older people, didn't want to hurt the feelings of the people providing care. While some had experience of raising issues with care providers and services being adapted accordingly, others found that no steps were taken to rectify issues. Some service users then felt care providers did not listen to them. Carers were more likely than people who use services to speak up if they were concerned about any aspects of the service delivery, but carers felt that care professionals did not treat them as partners.⁵⁵

72. People who use social work services, and their carers, are very diverse, with differing needs. Although it is not easy to do, it is important that councils seek views and provide opportunities for involving as wide a range of people as possible in planning services or changing how they are provided. However, we found limited opportunities for people to be involved. Most of the six fieldwork councils involve representatives of both people who use services and carers in planning groups. For example, Perth and Kinross Council includes carer representatives on its multidisciplinary Carers Strategic Group. However, we found less evidence of people who use services and carers being involved more extensively in designing services.

73. Midlothian Council is one example where people who use services and carers are represented on joint planning groups, such as the Joint Older People's Planning Group that developed the Midlothian Joint Older People's Strategy 2011-15. A recent tender exercise for Care at Home in Midlothian included volunteer carers assessing all submissions, interviewing and final scoring. However, carers and people who use services generally have little involvement in commissioning or tendering, and there is scope to do more.

74. All of our fieldwork councils have a carers' strategy. All provide information for carers on their websites, including how and where to get help, which is usually through a carer assessment in the first instance. They also have partnerships with, or links to, other organisations and carers' centres in their area that provide information and support to carers. About half of the carers' centres are network partners of the national organisation Carers' Trust Scotland. Councils use various methods to collect the views of people using services, and of carers, including annual satisfaction surveys, carers' conferences and carer representatives on panels.

75. IJBs' membership must include a representative from people using services and a carer representative.⁵⁶ This is intended to ensure that carers have a role in planning and delivering of services delegated to IJBs. However, this alone is not enough to involve and consult the diverse range of people who use services and carers. Glasgow City Council has a carers' champion to represent the views of carers within the council ([Case study 3, page 36](#)).

I feel very lucky to live in [local authority]. The services for disabled people are the best in Scotland compared to other areas. [Local authority] listened to what people wanted, like supported living and individually tailored support plans.

Carer

Mental health services don't always recognise the carer input until they need them!

Carer

Everything is subject to funding therefore there is no consistency. Carers' centres need to be funded so that their services are ongoing.

Carer centre staff saved my life.

Carers

Case study 3

Glasgow City Council's Carers' Champion

Glasgow City Council's Carers' Champion represents the collective views of the city's unpaid carers within the council and speaks independently on carer issues. His role includes raising the profile of unpaid carers across the council and its wider network of agencies while also helping to develop strategies and policies that will support carers.

Glasgow has also introduced a privilege card for adult carers living in Glasgow who provide care for a Glasgow resident. It entitles them to various savings including:

- savings as part of Glasgow Life's concessionary discount scheme
- 20 per cent discount at a range of cafes in venues, such as art galleries and museums
- 20 per cent off City Parking multi-storey car parks
- discounts at certain cinemas and other commercial outlets.

In July 2015, Glasgow evaluated its Glasgow Carers Partnership, which includes Glasgow City Council, NHS Greater Glasgow and Clyde and voluntary sector organisations supporting carers within Glasgow. The council will use the resulting report and recommendations in planning and investment in carer services.

I had a procedure in hospital and I was in and out the same day, but the carer came to take me to hospital and came back at midnight to take me home. It was above and beyond.

Service user, physical disabilities

Some people we surveyed who use a homecare service were unhappy with the quality of their service

76. Between 2010/11 and 2014/15, the percentage of adults satisfied with social care or social work has fallen from 62 per cent to 51 per cent.⁵⁷ Our survey of 165 people who use services and of carers found that views on homecare dominated their discussions about the quality of care. Generally, participants with positive experiences of their current service provision highlighted some of the following factors:

- the importance of respectful and flexible carer workers
- good relationships with carer workers
- the ability to influence service delivery through self-directed support
- good timekeeping.

77. However, there were many examples of people not happy with their service experience. Common issues identified across all five local authority areas covered included:

- **Length of time a care worker spends with the person** – Most said that the care worker would be in their home for 15–20 minutes at a time. Many reported that this was not enough time to provide good quality care.

I did have [care company], and I got 15 minutes, so I had a choice between having breakfast and them running a bath for me to have on my own once they'd gone, or a shower with no breakfast.

Service user, physical disabilities

- **Timekeeping** – People who receive homecare discussed their experiences of homecare staff arriving earlier or later than expected. People we spoke to were frustrated at the homecare staff's timekeeping and poor communication.
- **Flexibility of role (undertaking tasks)** – Most people felt that the quality of care they received was affected by the limited flexibility of homecare staff in undertaking other household tasks.
- **Meals** – A large number of people receiving homecare and carers were not satisfied with the quality of the meals.
- **Trained homecare staff** – Others questioned the skills of some homecare staff. Their experience was that the homecare staff did not know how to handle them, or use equipment safely.

Paying care staff the Living Wage could help to reduce problems recruiting care staff, but may create other risks for providers

78. The Scottish Government's Living Wage commitment provides clear benefits for low-paid workers. However, increases in employee costs and contract costs will put pressure on councils' and service providers' finances. There are a number of risks with the current approach:

- The Scottish Government has no powers to enforce the Living Wage commitment; the UK Government reserves the power to set and enforce the legal minimum wage. The legal minimum wage across the UK is £7.20 for people aged 25 and over. The Living Wage is £8.25.
- There is a risk that providers operating across the UK may choose not to pay the Living Wage in Scotland.
- There is a risk that this could lead to unsustainable paybill increases. As well as increasing wages, National Insurance contributions and pension contributions will also rise, and service providers will need to maintain wage differentials. A recent survey of independent providers found that almost all will struggle to fund increases to £8.25 an hour. Future rises in the Living Wage may increase this pressure.
- Where councils have awarded contracts based on price before the adoption of the Living Wage, there is a risk that contractors who lost contracts, but who already pay wages at or above the living wage (and offering higher quality services) may ask councils to re-tender contracts.

79. Applying the Living Wage also provides significant opportunities to better manage the staffing issues we describe in [Part 1](#). Reduced staff turnover could potentially offset increased costs and provide an opportunity to improve staff skills. It could also make it easier to create a career structure for care workers and an opportunity to specialise, for example in providing services for younger people with particular disabilities, or for older people suffering from dementia.

80. Comhairle nan Eilean Siar and Perth and Kinross council felt there were particular challenges in recruiting suitably qualified staff to deliver services in isolated rural areas. In Eilean Siar, the council has set up college courses to encourage young people to view care as a worthwhile career option ([Case study 4, page 38](#)).

Sometimes they're late and sometimes they don't come at all.

Service user,
learning disabilities

Many people felt it was very important to have some continuity of care worker in terms of safety and building a rapport, but this was lacking. Just depressed at so many different (paid) carers coming in at all different times.

Carer

She gave me a fish pie and it was cold in the middle. She said she didn't have time to do it again, so I had to ask her to make me an omelette."

Service user,
older person

Case study 4

Comhairle nan Eilean Siar: developing a stable workforce

Comhairle nan Eilean Siar faces major demographic change over the next 20 years including a projected 19 per cent decline in the working age population and a 19 per cent increase in the over 75 population. There are also a high number of single person households with no family carers available. To help arrest the decline in working age population through migration, the council has developed a project to make being a care worker a viable and attractive career for young people leaving school, as well as adults looking at career options. There are four programmes:

- **Pre-Nursing Scholarship:** developed to encourage people to take up a nursing career locally and part of a national initiative to increase the nursing workforce. A critical aspect of this programme is the facility to provide equitable access to learning across the Western Isles in rural and remote locations.
- **Prepare to Care:** This course aims to qualify and prepare students for employment, further training, or both of these, within health and social care by developing the knowledge, skills and understanding required to work in the care sector.
- **Senior Phase SVQ2 Pilot:** Provides flexibility in terms of work-based assessment across health and social care and equips young people to work in the community. The newly revised Social Care and Health SVQ2 is being piloted with young people in Uist and Barra by Cothrom in partnership with the council and NHS Western Isles.
- **Foundation apprenticeship:** Skills Development Scotland selected the council's Education and Children Services department as a pathfinder authority for the senior phase vocational pathway development in Health and Social Care.

Source: Comhairle nan Eilean Siar

81. As explained in [Part 1](#), the recruitment and retention of suitable staff is a significant problem across the care sector. Councils and providers need to work together and with the Scottish Government on long-term planning to ensure there is an effective, well-trained sustainable workforce to meet future demand. The Scottish Government has commissioned work to identify the recruitment and retention challenges facing the sector and assess whether there is a case for a national workforce-planning tool. In addition, the Scottish Social Services Council (SSSC) is working with partners to develop career pathways within social care. The first is to develop foundation apprenticeships, a vocational pathway to enable young people to experience work in the care sector and encourage care as a positive career choice.

The girls that came in didn't know how to use a stand aid, and they couldn't do manual lifting.

physical disabilities

Part 3

Governance and scrutiny arrangements

Key messages

- 1 The integration of health and social care has resulted in complex and varied governance arrangements for social work services. Elected members have important leadership and scrutiny roles, but there are risks that increased complexity could lead to members not having an overall view of social work. At a time of great change, it is essential that elected members assure themselves that the quality of social work services is being maintained and that councils are managing risks effectively. It is important that elected members receive training and guidance on the operation of the new governance arrangements and that elected members not involved in the IJB are fully informed about its operation.
- 2 The key role of the chief social work officer (CSWO) has changed significantly in recent years and there are risks that CSWOs may have too many roles and have insufficient status to enable them to fulfil their statutory responsibilities effectively.
- 3 There is scope for councils and their community planning partners to do more to promote and empower communities. This includes working with them to design, commission, deliver and evaluate services to achieve better outcomes, and to build capacity to allow communities to do more to support themselves. Elected members need to play a key role engaging with communities in a wider dialogue about council priorities.

elected members need to play a key role engaging with communities in a wider dialogue about council priorities

Social work governance and scrutiny arrangements are more complex because of health and social care integration

82. Councils' responsibilities in relation to social work are set out in the Social Work (Scotland) 1968 Act. The Act's provisions include promoting social welfare, caring for and protecting children, supervising and caring for people put on probation or released from prison and the children's hearings system.

83. Under the Public Bodies (Joint Working) (Scotland) Act 2014, councils and NHS boards are required to create integration authorities. These are responsible for the governance, planning and resourcing of adult social care services, adult primary care and community health services and some hospital services. Governance describes the structures, systems, processes, controls and behaviours by which an organisation manages its activities and performance. The Act also allows councils and NHS boards to integrate other areas of activity, such as children's health and social care services and criminal justice social work.

84. This means that councils delegate to the integration authority (IA) their responsibility for strategic planning for adult social services and for any other services they decide to include. Councils still carry the ultimate responsibility for the delivery of social work services in their area and elected members need to assure themselves that the council is meeting its statutory responsibilities.

85. IAs are responsible for planning and commissioning functions delegated from the local council and NHS board. IAs can adopt one of two main structures. All areas except the Highland Council area are following the body corporate model. Under this, they have created an Integration Joint Board (IJB) to plan and commission integrated health and social care services in their areas. Highland is following the lead agency model, NHS Highland is the lead for adult health and care services, with Highland Council the lead for children's community health and social care services. IJBs are local government bodies, as defined by Section 106 of the Local Government (Scotland) Act 1973. Councils and NHS boards delegate budgets to the IJB. The IJB decides how to use these resources to achieve the objectives of its strategic plan. The IJB then directs the council and NHS board to deliver services in line with this plan.

86. Councils have adopted various arrangements for integration. Nine councils integrated children's social work services within the IJB and 16 councils integrated social work criminal justice services.⁵⁸ The following arrangements were adopted by our fieldwork councils:

- Midlothian Council and Comhairle nan Eilean Siar include criminal justice but not children's social work services.
- East Renfrewshire Council and Glasgow City Council include both children's social work and criminal justice social work services.
- West Lothian Council and Perth and Kinross Council only include adult services.

87. The governance and scrutiny arrangements in four of our fieldwork councils (Comhairle nan Eilean Siar, Glasgow, Perth and Kinross and West Lothian) are included in [Supplement 3](#) . These illustrate the variety and complexity of arrangements now in place within councils.

88. At the time of our fieldwork, governance arrangements were still under discussion. Council chief executives were clear that accountability lies with the council for services delegated to the IJB because, under legislation, the council retains statutory responsibility for delivering social work services. But we have previously highlighted the risk that ultimate responsibility might lie with IJBs, which plan and direct councils and NHS boards in how services are to be delivered.⁵⁹ All parties need to recognise this risk and set out clearly an agreed understanding of each other's roles and responsibilities. It is essential that the chief officer of the IJB is clear about how this joint accountability will work in practice.

89. Accountability arrangements for the IJB chief officer are complex. The chief officer has a dual role. They are accountable to the IJB for the responsibilities placed on the IJB under the Act and the integration scheme. They are accountable to the council and NHS board for any operational responsibility for integrated services, as set out in the integration scheme.

90. Governance and scrutiny arrangements for IJB and non-IJB services within our fieldwork councils varied, even where the same services are included within

the IJB's remit. For example, in East Renfrewshire, scrutiny of performance happens within the IJB Audit and Performance Committee and an annual report is presented to the Council. While Comhairle nan Eilean Siar concluded that appropriate scrutiny could be provided within its existing council committee structure and that a separate mechanism for IJB functions was not required.

[Supplement 3](#)  shows the variation in integration arrangements in four of our fieldwork councils. Whatever model councils choose, elected members need to assure themselves that the scrutiny arrangements are working effectively.

91. As governance and scrutiny arrangements for social work were still in transition at the time of our fieldwork visits (some changes were implemented in March 2016), it is too early to make judgements as to whether there are duplications or gaps in scrutiny. Councils indicated that they would review arrangements if they did not appear to be working effectively. Our fieldwork highlighted a number of potential risks. These include:

- the potential for an overall view of governance being lost when social work services (and budgets) are split, for example between education and children's services and the IJB
- a focus on health and adult services could restrict discussion of children's services and, in particular, criminal justice services on IJB scrutiny committees.

92. Council representation on the IJB is generally four or five senior elected members (around ten per cent of elected members), usually including the leader of the council and a senior opposition member. This means that a small subset of elected members of the council and members of the NHS board will be responsible for social work governance and scrutiny within the IJB and its committees. There is a risk that the majority of elected members could feel excluded from social work decision-making and scrutiny. There is also a risk that this arrangement leaves responsibility for governance and scrutiny with a small number of very busy elected members. Councils have set up a variety of mechanisms to ensure they keep all elected members informed. For example, Comhairle nan Eilean Siar and the IJB will hold at least two meetings a year with the wider membership of the council and NHS Western Isles.

93. It is important that elected members receive training and guidance on the operation of the new governance arrangements. The Scottish Government has produced guidance on the roles, responsibilities and membership of the Integration Joint Board.⁶⁰ COSLA is working with the Improvement Service and the Scottish Government to support elected members who do not sit on IJB boards to help them fulfil their role, including councils' ongoing statutory duties. COSLA intends to produce an elected member briefing note focusing on councils' role and interests to ensure they are kept informed of the changes. It is also hosting workshops for elected members to share their experiences. We have included an elected member's checklist as [Supplement 4](#) . Elected members may wish to use the checklist to help them consider the effectiveness of the arrangements in their council.

Health and social care integration may make strategic planning of services more difficult

94. Each IJB is required to produce a strategic plan that includes strategies for all the services delegated to it. We examined strategies for social work services in our fieldwork councils. Strategies are set out in various ways depending on the health and social care arrangements in each council. While the plans for integrated services were well developed, they are new and untested.

95. Where councils have chosen not to include services for children within their IJB, they usually continue to follow existing arrangements. For example, some align children's social work services with education, in education and children's services. In others, these services are part of an existing Health and Social Care Partnership Directorate. Strategies for services that are not within the IJB are set out in council plans such as the education and children's services plan.

96. Where criminal justice services are included within the IJB, strategies were not always as clearly set out. IJB plans generally included few references to criminal justice and some services did not have a specific criminal justice plan. Whether as part of the IJB or not, councils have, until now, worked in partnership with their Community Justice Authority (CJA) and contributed to its area and action plans. However, under The Community Justice (Scotland) Act 2016, CJAs will be abolished from 2017. Responsibility for community justice will transfer to community planning partnerships. It is important that under the new approach, strategies for criminal justice services are clearly set out as part of the IJB or community planning arrangements.

97. All the social work plans we examined demonstrate links to community planning. As members of the community planning partnerships, both IJBs and councils have signed up to local single outcome agreements (SOA) with the Scottish Government, and share the vision and priorities within these.

98. It is important that there are clear linkages between the planning of those services that are integrated and those that are not, for example the transition from children's services to adult services or between children's services and criminal justice. Planning for these transitions needs to be well coordinated to ensure a seamless service without overlaps or gaps in services, particularly where responsibility is split between the IJB and the council.

99. It is important that the scrutiny arrangements reflect the risks associated with managing transitions. Councils and elected members will need to ensure they have a strategic overview of the whole of social work service and ensure that strategy, budget arrangements, commissioning, procurement and workforce planning are coordinated at a council-wide level.

There is a risk that chief social work officers may become over-stretched

100. The Social Work (Scotland) Act 1968 requires local authorities to appoint a single chief social work officer (CSWO) who must be a qualified social worker and registered with the Scottish Social Services Council. The CSWO should demonstrate professional leadership. They have a responsibility to highlight where a council policy may endanger lives or welfare and ensure that they provide councillors and officers with professional advice in relation to social work and social care services. The CSWO should have access to the chief executive and other senior managers, councillors and social work officers. The CSWO is one of five statutory officers in councils: that is, officers that each council is required to appoint by law.⁶¹

101. Scottish ministers issued revised guidance on the role of the CSWO in July 2016 to reflect the introduction of health and social care integration. This summarises the minimum scope of the CSWO role, recognising the diversity of the structures and partnerships that deliver social work services. The CSWO's responsibilities apply to social work functions whether delivered by the council or

I'm happy with the services for my daughter but it was a hard fight over many years. As she moves to adult services, am I going to have to start fighting again? It worries me.

Carer

by other bodies under integration or partnership arrangements.⁶² The guidance states that management and reporting structures are a matter for councils. But if the CSWO is not a full member of the corporate management team, elected members must be satisfied that the officer has appropriate access, influence and support at the most senior level. We found consensus among elected members and chief executives that it is important that the CSWOs are senior enough to carry out their responsibilities effectively. However, the CSWO's position in the hierarchy, and the arrangements to allow them to contribute to decision-making, varied between councils.

102. When the CSWO role was combined with that of Director of Social Work, the ability to influence was clear. But councils have developed executive team structures and most no longer have a Director of Social Work. At present six CSWOs are at director level and 24 are heads of service, the tier below this, with one tier-three manager in a temporary acting up role. In addition, a large proportion of CSWOs are new to the role. A survey by Glasgow Caledonian University, in November 2015, found that over half had been in post less than three years, and nine for less than a year.

103. CSWOs have strategic and professional responsibility for social work, including monitoring service quality and professional standards. Good practice indicates this should be across the full range of a council's social work functions. Scottish ministers' guidance says the CSWO must have the power and authority to provide professional advice and contribute to decision-making in the council and health and social care partnership arrangements. However, the structure of social work provision has changed over time and CSWOs do not always have operational responsibility across all functions. For example, in Midlothian, the CSWO has operational responsibility for adult services but not for services for children or older people.

104. Integration does not change the CSWO's responsibility to provide professional leadership. However, some CSWOs expressed concerns that, where children's services and/or criminal justice sit within the IJB, health issues and adult care will dominate the IJB both in terms of the agenda and in terms of personnel. They were concerned that representation of these services on the agenda would be small in comparison to adult services.

105. Reporting lines for CSWOs always lie within the council and the establishment of IJBs does not change this. However, CSWOs now have an additional statutory, non-voting place as adviser to the IJB (or the Integration Joint Monitoring Committee in Highland's lead agency model). CSWOs need to establish good, effective working relationships with their IJB chief officer. CSWOs' roles vary across all thirty-one IJBs in terms of what they are accountable for. Integration means that those CSWOs who were previously responsible for adult social care services will lose direct responsibility for their management and budget.

106. Scottish ministers' guidance indicates that the CSWO must be visible and available to any social services worker, and ensure well-grounded professional advice and guidance on practice is available. Social workers in our focus groups generally felt that their CSWO was both visible and accessible, and felt confident about consulting them.

107. The ability of CSWOs to carry out their role effectively and not become too 'stretched' across multiple functions is a potential concern. CSWOs may have

to report to one or more council committees, sit on the IJB, and attend the council corporate management team or senior management team and the IJB management team, as well as undertake day-to-day service management roles. It is important for CSWOs to achieve the trust and confidence of councils' NHS partners in order to have an influence in decision-making. CSWOs had mixed views on whether their role within the IJB would have a negative impact on their visibility or accessibility to elected members and social workers. It is too early to see how effective new arrangements will be.

108. The statutory guidance requires all CSWOs to report annually to the council and IJB on all of the statutory, governance and leadership functions of the role and delivery of the council's social work functions. This applies however they are organised or delivered. A review of CSWO annual reports in 2013 found a lack of consistency in the content and format. After consultation with relevant individuals and groups, the chief social work adviser published guidance on the content and a template for the report. The CSWO annual report gives an opportunity for the CSWO to draw together all the important strands of their work and report on them to elected members. It should provide an opportunity for the CSWO to raise their profile with elected members and, more importantly, draw their attention to any potential concerns about social work or governance issues.

109. The CSWO reports we examined from our fieldwork sites generally followed the template, but varied in the amount and level of information included. For example, Glasgow's report for 2014/15 is more concise (nine pages long with links to relevant reports and strategies), with less detail included compared with Perth and Kinross (71 pages), which contains a lot of activity information and good practice examples. CSWO reports may be considered at various meetings including full council, relevant council committees or panels or the IJB. Social work performance is regularly scrutinised through council or IJB monitoring systems and scrutiny happens through monthly, quarterly or six-monthly performance reports at appropriate committees. CSWO reports are also important in providing a high-level summary of the performance of social work functions during a particular year. It is essential that they are subject to effective scrutiny by elected members. However, we did not find evidence of detailed scrutiny of the report or challenge at these meetings.

110. The Scottish Social Services Council (SSSC) working with universities and others, has recently developed a qualification for CSWOs. The postgraduate diploma is aimed specifically at those currently in the CSWO role or who aspire to the role. There is also an option to proceed to a Masters qualification. CSWOs and social worker managers who we interviewed who are studying for this qualification all found it helpful and useful in practice, as well as helping the council in succession planning.

Elected members are key decision-makers for local social work services

111. During the era of steadily increasing council spending that ended in 2010, people's expectations were raised as to the level of service that social work services could provide. Councils are now in an era of reducing spending. Councils need to play a leading role in a wider conversation with the public about the level of social work services they can realistically provide and how they can best provide it. Current arrangements for providing care are not sustainable in the long term, given the demographic and financial pressures. As we reported in *Changing models of health and social care*: 'Services cannot continue as they are and a significant cultural shift

in the behaviour of the public is required about how they access, use and receive services'.⁶³ Elected members need to play a key role in this change, engaging with communities in a wider dialogue about council priorities.

112. The Christie Commission suggested that councils should work closely with individuals and communities to understand their needs, maximise talents and resources, support self-reliance, and build resilience. Communities have a significant role to play, and councils and their community planning partners should do more to encourage and help them to assume more responsibility for supporting themselves. North Lanarkshire's *Making Life Easier* service is a website that helps people to identify problems and develop their own solutions through information, professional advice and direct access to services and support ([Case study 5](#)).

Case study 5

Making Life Easier

North Lanarkshire Council worked with ADL Smartcare to develop a website to help those who wish to live independently at home. *Making Life Easier* provides professional advice and guidance on health issues and on managing daily living tasks. It includes hints and tips and signposts to organisations such as social and support groups, lunch clubs and drop-in cafes.

People and their carers can do an online self-assessment to identify safe and suitable equipment and minor adaptation choices that will help them manage their lives. People can choose to get the equipment and minor adaptations they need without charge through a link to the council's integrated equipment and adaptation service, or there is information on how to buy it for themselves.

East Lothian Council is developing a similar service, which they will call HILDA – Health and Independent Living with Daily Activities.

Source: North Lanarkshire Council

113. Although health and social care integration will change the way social work services are commissioned and funded, councils remain responsible for promoting social welfare.⁶⁴ This includes improving outcomes for people who use services. Councils and IJBs need to ensure they are scrutinising budgets, plans and outcomes, including the effectiveness of services and the impact on individuals.

114. Elected members may find that their role changes, but they remain the key decision-makers for social work services on behalf of their constituents and they ensure effective scrutiny, governance and strategic oversight of the new arrangements. It is essential that elected members assure themselves of the quality of social work services and ensure councils manage risks effectively at a time of great change. With increasing financial pressures, councillors may face a difficult challenge in managing people's expectations, but they have a crucial role in doing so and providing leadership for their communities.

Endnotes

- ◀ 40 [Changing models of health and social care](#) , Audit Scotland, March 2016.
- ◀ 41 The NHS and Community Care Act 1990 provides a statutory framework for community care, which forms the cornerstone of community care law. It places a duty on local authorities to assess an individual's need for 'community care services'.
- ◀ 42 Scottish Government and COSLA guidance on a national framework for eligibility criteria, 2009.
- ◀ 43 *Route Map to the 2020 Vision for Health and Social Care*, Scottish Government, May 2013.
- ◀ 44 Data from Children's Social Work Statistics Scotland, 2011/12, Scottish Government, March 2013 and Children's Social Work Statistics Scotland, 2014-15, Scottish Government, June 2016.
- ◀ 45 *Getting it right for children in residential care*, Audit Scotland, September 2010.
- ◀ 46 Recreate Volunteer Programme: A social return on investment (SROI) analysis, Margaret Smith and Vikki Binnie, 2014. An SROI considers the length of time changes last to assess future value. Because this user group is often associated with a chaotic lifestyle, the study shows a range in value to reflect a conservative estimate and an estimate reflecting the sustained changes possible.
- ◀ 47 Local Government Benchmarking Framework, Improvement Service (website).
- ◀ 48 A framework agreement does not have to be a contract. However, where it is a contract it is treated like any other contract, and the EU procurement rules apply.
- ◀ 49 The 2016/17 fees paid to providers for local authority placements are set at £624.54 a week for nursing care and £537.79 for residential care until 30 September. After that, fees will increase to £648.92 a week for nursing care, and £558.77 for residential care until April 2017 (the £372 figure in paragraph 62 has income from contributions deducted). Fees for self-funders tend to be substantially higher.
- ◀ 50 Scottish Statistics on Adults Resident in Care Homes, 2006-2015, ISD Scotland, October 2015.
- ◀ 51 Local Government Benchmarking Framework, Improvement Service (website).
- ◀ 52 The Care Home Census: Scottish Statistics on Adults Resident in Care Homes 2006-2015. The census includes data on adults living in care homes in Scotland that are registered with the Care Inspectorate.
- ◀ 53 NHS National Services Scotland, Public Health and Intelligence, 2016.
- ◀ 54 These figures are for residents who do not require nursing care. The equivalent figures for residents who do require nursing care are £775 and £590.
- ◀ 55 The Scottish Government is holding a 'national conversation' on health and social care services. Some of the carer's quotes are taken from the Coalition of Carers in Scotland event to support carers to contribute their views, held on 25 November 2015.
- ◀ 56 The Public Bodies (Joint Working) (Integration Joint Boards) (Scotland) Order 2014.
- ◀ 57 Local Government Benchmarking Framework, the improvement service.
- ◀ 58 A full list of the arrangements in all councils is included in Exhibit 8, page 22 of *Health and social care integration*, Audit Scotland, December 2015.
- ◀ 59 [Health and social care integration](#) , Audit Scotland, December 2015.
- ◀ 60 Roles, Responsibilities and Membership of the Integration Joint Board, Scottish Government, September 2015.
- ◀ 61 The others are: The Head of Paid Service (chief executive) responsible to councillors for the staffing and ensuring the work of the council is co-ordinated; the Monitoring Officer prepares governance documents and advises councillors about legal issues; the Chief Financial Officer; the Chief Education Officer.
- ◀ 62 The Role of Chief Social Work Officer, Guidance Issued by Scottish ministers, pursuant to Section 5(1) of the Social Work (Scotland) Act 1968, Revised Version, July 2016.
- ◀ 63 [Changing models of health and social care](#) , Audit Scotland, March 2016.
- ◀ 64 Social Work (Scotland) 1968 Act.
